Advances in Bone Marrow Purging and Processing Adrian P. Gee,Samuel Gross,Diana A. Worthington-White,1994-10-04 Examines emerging technology in this field from both the research and clinical arenas The book describes approaches for utilizing DNA sense and antisense probes combinations of elutriators and immunomagnetics as well as refinements in the use of mechanical separation Contributions from more than 400 investigators address topics such as pharmacological purging marrow processing clinical studies and tumor cell detection

Advances in Bone Marrow Purging and Processing Diana A. Worthington-White,1992 Surveys the latest research discoveries and current clinical procedures for selectively separating and analyzing subpopulations of cells from bone marrow Over 400 internationally renowned experts offer contributions on such topics as approaches for using DNA sense and antisense probes combinations of elutriators and immunomagnetics expanded cytokines applications new techniques for the removal of tumor cells from autologous bone marrow and T cells from allogeneic grafts

Bone Marrow Purging and Processing Samuel Gross,Adrian P. Gee,Diana A. Worthington-White,1990 This volume assesses research findings as well as the clinical aspects now in use for selectively separating subpopulations of cells from bone marrow It examines a full range of purging processes including transplantation programs cryopreservation cell isolation and cell growth specificity testing and quality control as well as the development of alternative sources of stem cells including peripheral blood and cadaveric marrow It also presents the conditions necessary to optimize graft toxicity and bone marrow transportation and addresses newer techniques of gene probing processing as well as mechanisms of genetic alteration including electroporation

Principles of Cancer Biotherapy R.K. Oldham,2012-12-06 At the time of the first edition of Principles of Cancer Biotherapy this book represented the first comprehensive textbook on biological therapy Whereas in 1991 when the second edition was published there was still some doubt on the part of many oncologists and cancer researchers as to the therapeutic value of these new approaches it is now generally agreed that biopharmaceuticals are producing major opportunities for new cancer therapies Cancer biotherapy has truly matured into the fourth modality of

cancer treatment The third edition is now needed as a result of the tremendous progress that has been made in recent years using biologicals in cancer treatment The book summarizes an evolving science and a rapidly changing medical practice As we near the millennium it now becomes possible to envision a much more diversified system of cancer research and treatment that will afford greater opportunities for patients Some forms of cancer biotherapy use the strategy of tumour stabilization and control through continued biological therapy akin to the use of insulin in the treatment of diabetes This textbook illustrates new methods of thinking and new strategies for control of cancer It is always difficult to move from past dogma to future opportunity but this third edition of Principles of Cancer Biotherapy illustrates why it is so important to the patients for researchers and clinicians to explore and apply these new opportunities in cancer biotherapy Principles of Cancer Biotherapy Robert K.
