Of Rhythm:

The Philosophy of Rhythm Peter Cheyne, Andy Hamilton, Max Paddison, 2019 Rhythm is the fundamental pulse that animates poetry music and dance across all cultures And yet the recent explosion of scholarly interest across disciplines in the aural dimensions of aesthetic experience particularly in sociology cultural and media theory and literary studies has yet to explore this fundamental category This book furthers the discussion of rhythm beyond the discrete conceptual domains and technical vocabularies of musicology and prosody With original essays by philosophers psychologists musicians literary theorists and ethno musicologists The Philosophy of Rhythm opens up wider and plural perspectives examining formal affinities between the historically interconnected fields of music dance and poetry while addressing key concepts such as embodiment movement pulse and performance Volume editors Peter Cheyne Andy Hamilton and Max Paddison bring together a range of key questions What is the distinction between rhythm and pulse What is the relationship between everyday embodied experience and the specific experience of music dance and poetry Can aesthetics offer an understanding of rhythm that helps inform our responses to visual and other arts as well as music dance and poetry And what is the relation between psychological conceptions of entrainment and the humane concept of rhythm and meter Overall The Philosophy of Rhythm appeals across disciplinary boundaries providing a unique overview of a neglected aspect of aesthetic experience

The Rhythm of Prose William Morrison Patterson, 1916 **Psychological Monographs** Psychological Review Publications, 1927 **Geographies of Rhythm** Tim Edensor, 2016-04-15 In Rhythmanalysis Henri Lefebvre put forward his ideas on the relationship between time and space particularly how rhythms characterize space Here leading geographers advance and expand on Lefebvre's theories examining how they intersect with current theoretical and political concerns within the social sciences In terms of geography rhythmanalysis highlights tensions between repetition and innovation between the need for consistency and the need for disruption These tensions reveal the ways in which social time is managed to ensure a measure of stability through the instantiation of temporal norms whilst at the same time showing how this is often challenged In looking at the rhythms of geographies and drawing upon a wide range of geographical contexts this book explores the ordering of different rhythms according to four main themes rhythms of nature rhythms of everyday life rhythms of mobility and the official and routine rhythms which superimpose themselves on the multiple rhythms of the body
