Production Procedures For Today's Technology:

Current Research in Pharmaceutical Technology Sabine Globig, William Hunter Jr., 2011-12-15 This title includes a number of Open Access chapters Pharmaceutical technology deals with the discovery production processing and safe and effective delivery of medications to patients Technologies involved include computer modeling for research bioengineering for research instrumentation processes and methods for increasing production and c

Biojet Fuel: Current Technology and Future Prospect Arindam Kuila, 2024-02-20 This book covers the basic knowledge of biojet fuel explores the current technological status and presents future prospects for commercial biojet fuel production The focus of this book is on biojet fuel production from different types of potential substrates It also includes technoeconomic analysis and life cycle assessment of biojet fuel Biojet fuel is currently recognized as the best alternative to petroleum based jet fuel due to its renewability and sustainable features However there is a scarcity of reports on biojet fuel production from various types of substrates The aviation industry globally consumes approximately 200 million tonnes of jet fuels each year with a projected continuous growth rate of 5% per year until 2050 Seymour et al 2020 Currently the global demand for jet fuel is predominantly met by petroleum based fuels However the limited availability of fossil fuels and increasing concerns about climate change have placed significant pressure on commercial airlines to reduce greenhouse gas emissions and embrace cleaner and more sustainable practices Biojet fuel has emerged as the most favorable alternative to petroleum based jet fuel due to its renewable nature and sustainable characteristics Despite its potential there is a limited number of reports available on the production of biojet fuel from different types of substrates The present scenario of biojet fuel necessitates the development of improved and cost effective technologies that can yield long term benefits The book is useful for students and researchers in various branches of life sciences including environmental biotechnology bioprocess engineering renewable energy chemical engineering nanotechnology biotechnology microbiology and more

AMST'05 Advanced Manufacturing Systems and Technology Elso Kuljanic, 2007-03-23 Manufacturing a product is not difficult the difficulty consists in manufacturing a product of high quality at a low cost and rapidly Drastic technological advances are changing global markets very rapidly In such conditions the ability to compete successfully must be based on innovative ideas and new products which has to be of high quality yet low in price One way to achieve these objectives would be through massive investments in research of computer based technology and by applying the approaches presented in this book The First International Conference on Advanced Manufacturing Systems and Technology AMST87 was held in Opatija Croatia in October 1987 The Second International Conference on Advanced Manufacturing Systems and Technology AMSV90 was held in Trento Italy in June 1990 The Third Fourth Fifth and Sixth Conferences on Advanced Manufacturing Systems and Technology were all held in Udine Italy as follows AMST93 in April 1993 AMST96 in September 1996 AMST99 in June 1999 and AMST02 in June 2002

Current Trends and Future Developments on (Bio-) Membranes Angelo Basile, Alberto Figoli, Yongdan

Li,2019-11-27 Current Trends and Future Developments in Bio Membranes Membranes in Environmental Applications offers an overview of environmental pollution covering the air water waste from agriculture and climate change and including emerging offenders such as microplastics and electronic waste which can be solved by conventional and advanced membrane techniques Chapters cover environmental pollution issues followed by specific membrane processes problems related to environmental pollution and the different techniques used for solving these problems For each pollutant such as CO2 and fuel water and wastewater waste from agriculture etc specific membrane processes are described Users will find a comprehensive overview on the environmental problems that influence climate change and aquatic water preservation CO2 emission and air pollution metals toxic pollutants in water wastewater problems and treatments and more Presents an overview on the interconnections between membrane technology and environmental issues Provides a comprehensive review of the environmental pollution issues tackled by membrane processes Addresses key issues in energy production from renewable sources

Introduction to Supply Chain Management Technologies David Frederick Ross, Frederick S. Weston, Stephen W., 2010-10-12 It is almost impossible to conceive of the concept and practical application of supply chain management SCM without linking it to the enabling power of today s information technologies Building upon the foundations of the first edition Introduction to Supply Chain Management Technologies Second Edition details the software toolsets and suites
