101 Classic Magic Tricks Guy Frederick,1995 Reveals the secrets of some of the most famous magic tricks that have been baffling audiences for years 8 11 yrs **Classic Magic** John Wood,2018-07-15 Even today years after they first began people still love to watch magicians perform classic magic tricks Readers of this illuminating volume learn about some of the oldest and most well known magic tricks still being performed today They investigate the magicians who perform these tricks past and present and even find out some of the secrets to how these illusions are done This engaging book is packed with colorful photographs and interesting text that will keep curious readers turning the pages **Classic Magic Tricks** Bob Longe,David Knowles,Charles Barry Townsend,2002 Abracadabra Virtually every type of incredible magic trick imaginable is right here in this huge collection Choose any one from this great repertoire of seemingly unexplainable hocus pocus and you will astound people without fail Use mental magic to mystify a crowd with uncanny mathematical talent Defy reality by performing the French Drop a coin sleight that will astound spectators with your ingenious skills Create suspense when you make a spirited handkerchief rise and fall There s no end to the fun *101 Easy-to-learn Classic Magic Tricks* Bill Tarr, Frank Daniel,1977 A step by step guide to performing 101 magic tricks using easily available objects as props *Magic Tricks & Illusions* Will Goldston,2012-12-18 This classic magic tricks book has long been out of print but is now again available to magic enthusiasts and collectors Of enormous importance to the field of amateur magic Magic Tricks Illusions feature over 250 feats and tricks All routines are outlined and illustrated with a springboard of derivations offered for the ambitious entertainer Ranging from simple routines to elaborate maneuvers these tricks will appeal to the person with a penchant for performing as well as to the individual with a curiosity about how magic works Classic magic acts include The Vanishing Bird Cage The Chinese Egg Bag Trick The Flying Coin The Bodiless Lady Illusion The Flying Coin The Talking Scull And hundreds more 101 Cool Magic Tricks ,2005 Learn card tricks coin puzzlers mental magic and rope and ring tricks **The Psychology of Magic and the Magic of Psychology** Amir Raz,Jay A. Olson,Gustav Kuhn,2016-11-18 Magicians have dazzled audiences for many centuries however few researchers have studied how let alone why most tricks work The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions misdirection of attention and the appearance of mind control and nuanced persuasion Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic the neural correlates of such phenomena Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts the history of magic reveals that scientific discovery often charts new territories for magicians In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic On the one hand magic can inform psychology with particular benefits for the cognitive social developmental and transcultural components of behavioural science Magicians have a large and

robust set of effects that most researchers rarely exploit Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour For example magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make Moreover magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab based settings Examining how magicians consistently influence spectators for example can elucidate important aspects in the study of persuasion trust decision making and even processes spanning authorship and agency Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician On the other hand psychological science can advance the art of magic The psychology of deception a relatively understudied field explores the intentional creation of false beliefs and how people often go wrong Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities perceptual logical emotional and temporal becomes all the more revealing when top down influences including expectation symbolic thinking and framing join the fray Over the years science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences Furthermore on occasion science leads to the creation of novel effects or the refinement of existing ones based on systematic methods For example by simulating a specific card routine using a series of computer stimuli researchers have decomposed the effect and reconstructed it into a more effective routine Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention Behavioural scientists measure and study these factors By combining analytical findings with performer intuitions psychological science begets effective magic Whereas science strives on parsimony and independent replication of results magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception
