Mandeville's Travails Francis Tobienne Jr.,2016-06-20 This book offers a critical methodology for analyzing travel literature The subject of travel literature as well as travel literatures have not always been regarded with respect or given much critical attention In order to amend this lack of positive reception Francis Tobienne Jr analyzes the late medieval text Mandeville s Travels specifically the Cotton MS This text though not overly popular currently was among the most popular pieces of literature for well beyond its fourteenth century inception in some three hundred manuscripts divided into three groups as well as early printed editions further this text offers a way in which to approach other pieces of travel literature To facilitate this critical process Tobienne proposes a seven part method 1 Identify and Define the Problem 2 Make Observations 3 Look for Regularities 4 Wonder Why Regularities Exist 5 Propose a Hypothesis 6 Use an Experiment and 7 Have Reproducible Results Of note Mandeville s Travels is both the impetus behind this seven part method as well as the object of study Thus Tobienne showcases how each element of the seven part method is at play in the text even as he argues for the text s importance within medieval studies Also included in this examination is the application of this seven part method to medieval and post period pieces of literature The book culminates in an argument for the canonization and importance of Mandeville s Travels in and beyond medieval studies

The Medieval New Patricia Clare Ingham,2015-04-07 Despite the prodigious inventiveness of the Middle Ages the era is often characterized as deeply suspicious of novelty But if poets and philosophers urged caution about the new Patricia Clare Ingham contends their

apprehension was less the result of a blind devotion to tradition than a response to radical expansions of possibility in diverse realms of art and science. Discovery and invention provoked moral questions in the Middle Ages serving as a means to adjudicate the ethics of invention and opening thorny questions of creativity and desire. The Medieval New concentrates on the preoccupation with newness and novelty in literary, scientific, and religious discourses of the twelfth through sixteenth centuries. Examining a range of evidence from the writings of Roger Bacon and Geoffrey Chaucer to the letters of Christopher Columbus and attending to histories of children's toys, the man-made marvels of romance, the utopian aims of alchemists, and the definitional precision of the scholastics, Ingham analyzes the ethical ambivalence with which medieval thinkers approached the category of the new. With its broad reconsideration of what the newfangled meant in the Middle Ages, *The Medieval New* offers an alternative to histories that continue to associate the medieval era with conservatism rather than with novelty, its benefits, and liabilities. Calling into question present-day assumptions about newness, Ingham's study demonstrates the continued relevance of humanistic inquiry in the so-called traditional disciplines of contemporary scholarship.

Inventing Americans in the Age of Discovery Michael Householder, 2016-05-06 *Inventing Americans in the Age of Discovery* traces the linguistic, rhetorical, and literary innovations that emerged out of the first encounters between Europeans and indigenous peoples of the Americas. Through analysis of six texts, Michael Householder demonstrates the role of language in forming the identities or characters that permitted Europeans, English speakers primarily, to adapt to the unusual circumstances of encounter. Arranged chronologically, the texts examined include John Mandeville's *Travels*, Richard Eden's English language translations of the accounts of Spanish and Portuguese discovery and conquest, George Best's account of Martin Frobisher's voyages to northern Canada, Ralph Lane's account of the abandonment of Roanoke, John Smith's writings about Virginia, and John Underhill's account of the Pequot War. Through his analysis, Householder reveals that English colonists did not share a universal, homogeneous view of indigenous Americans as savages, but that the writers, confronted by unfamiliar peoples and situations, resorted to a mixed array of cultural beliefs, myths, and theories to put together workable explanations of their experiences, which then became the basis for how Europeans in the colonies began transforming themselves into Americans.
