Classifications Of Abelian Groups And Pontryagin Duality:

Classifications of Abelian Groups and Pontryagin Duality Peter Loth, 1998-09-16 In the first part of this book the reader is introduced to the theory of abelian groups focusing on the classification problem The structure of totally projective p groups is determined and Hill's version of Ulm's Theorem is proved It is shown how this classification theorem is generalized to larger classes of abelian groups such as the balanced projective groups and Warfield groups A variety of characterizations of these groups is proved generalizing corresponding results for totally projective p groups In the second part of this text the author studies certain classes of compact abelian groups using Pontryagin duality After providing the necessary tools for dualization the structure of the compact groups dual to the totally projective p groups balanced projective groups and Warfield groups is established Finally the duals of completely decomposable groups and Butler groups are studied Supplemented with numerous exercises and research problems this book is suitable for graduate students as well as undergraduate students with a sufficient background in algebra and topology

Pontryagin Duality and the Structure of Locally Compact Abelian Groups Sidney A. Morris, 2014-05-14 These lecture notes begin with an introduction to topological groups and proceed to a proof of the important Pontryagin van Kampen duality theorem and a detailed exposition of the structure of locally compact abelian groups Measure theory and Banach algebra are entirely avoided and only a small amount of group theory and topology is required dealing with the subject in an elementary fashion With about a hundred exercises for the student it is a suitable text for first year graduate courses

Abelian Groups, Rings, and Modules Andrei V. Kelarev, 2001-03-02 This volume presents the proceedings from the conference on Abelian Groups Rings and Modules AGRAM held at the University of Western Australia Perth Included are articles based on talks given at the conference as well as a few specially invited papers The proceedings are dedicated to Professor Laszlo Fuchs The book includes a tribute and a review of his work by his long time collaborator Professor Luigi Salce Four surveys from leading experts follow Professor Salce's article They present recent results from active research areas Error correcting codes as ideals in group rings Duality in module categories Automorphism groups of abelian groups and Generalizations of isomorphism in torsion free abelian groups In addition to these surveys the volume contains 22 research articles in diverse areas connected with the themes of the conference The areas discussed include abelian groups and their endomorphism rings modules over various rings commutative and non commutative ring theory varieties of groups and topological aspects of algebra The book offers a comprehensive source for recent research in this active area of study

Curves and Abelian Varieties Valery Alexeev, 2008-08-15 This book is devoted

to recent progress in the study of curves and abelian varieties It discusses both classical aspects of this deep and beautiful subject as well as two important new developments tropical geometry and the theory of log schemes In addition to original research articles this book contains three surveys devoted to singularities of theta divisors of compactified Jacobians of singular curves and of strange duality among moduli spaces of vector bundles on algebraic varieties *Abelian Fields and Duality of Abelian Groups* Reinhold Baer,1937 *Pontryagin Duality and the Structure of Locally Compact Abelian Groups*,1977* **The Pontrjagin Duality Theorem** Scott E.
