Maple and Mathematica Inna K. Shingareva, Carlos Lizárraga-Celaya, 2010-04-29 In the history of mathematics there are many situations in which calculations were performed incorrectly for important practical applications Let us look at some examples the history of computing the number began in Egypt and Babylon about 2000 years BC since then many mathematicians have calculated e g Archimedes Ptolemy Vi etc etc The first formula for computing decimal digits of e was discovered by J Machin in 1706 who was the first to correctly compute 100 digits of e Then many people used his method e g W Shanks calculated with 707 digits within 15 years although due to mistakes only the first 527 were correct For the next examples we can mention the history of computing the ne structure constant that was first discovered by A Sommerfeld and the mathematical tables exact lutions and formulas published in many mathematical textbooks were not verified rigorously 25 These errors could have a large effect on results obtained by engineers But sometimes the solution of such problems required such technology that was not available at that time In modern mathematics there exist computers that can perform various mathematical operations for which humans are incapable Therefore the computers can be used to verify the results obtained by humans to discovery new results to provetheresultsthat a human can obtain without any technology With respect to our example of computing we can mention that recently in 2002 Y Kanada Y Ushiro H Kuroda and M Applied Mechanics Reviews ,1996 **Maple User Manual** ,2007 **Syllabus** ,1996 **Solving Dynamics Problems in Maple by Brian Harper T/a Engineering Mechanics Dynamics 6th Edition by Meriam and Kraige** Brian D. Wang, 2006-03-17 A resource for mathematical methods in physics using MAPLE Through problems from core courses in the physics curriculum this book guides students to apply analytical and numerical techniques in mathematical physics and present the results in interactive graphics Quantum Mechanics Using Maple @ Marko Horbatsch, 2012-12-06 Quantum Mechanics Using Maple permits the study of quantum mechanics in a novel interactive way using the computer algebra and graphics system Maple V Usually the physics student is distracted from understanding the concepts of modern physics by the need to master unfamiliar mathematics at the same time In 39 guided Maple sessions the reader explores many standard quantum mechanics problems as well as some advanced topics that

introduce approximation techniques A solid knowledge of Maple V is acquired as it applies to advanced mathematics relevant for engineering physics and applied mathematics The diskette contains 39 Maple V for Windows worksheet files to reproduce all the problems presented in the text The suggested exercises can be performed with a minimum of typing

Space, Time And Matter Dipak K Sen, 2014-03-20 This volume deals with the fundamental concepts of space time and matter It presents a novel reformulation of both the special and general theory of relativity in which time does not constitute the fourth dimension in a conventional 4 dimensional space time Instead the role of time is played by the flow of a vector field on a 3 dimensional space The standard models of de Sitter Schwarzschild and Kerr space times are reformulated in a purely 3 dimensional manifold The volume also presents a theory of matter in which the fundamental particles such as baryons and leptons appear as a result of an interaction between left handed and right handed 2 component Weyl neutrinos The Appendices contain a comprehensive treatment of classical mechanics in terms of Hamiltonian vector fields on symplectic manifolds Graduate students of mathematical physics or theoretical physics as well as academics will find this volume of interest
