Clustering for 21st Century Prosperity National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives, 2012-09-14 Responding to the challenges of fostering regional growth and employment in an increasingly competitive global economy many U S states and regions have developed programs to attract and grow companies as well as attract the talent and resources necessary to develop regional innovation clusters These state and regionally based initiatives have a broad range of goals and increasingly include larger resources commitments often with a sectoral focus and often in partnership with foundations and universities Recent studies however have pointed out that many of these efforts lack the scale and the steady commitment needed for success This has prompted new initiatives to coordinate and concentrate investments from a variety of federal agencies to develop research parks business incubators and other strategies to encourage entrepreneurs and high tech development in the nation s regions Understanding the nature of innovation clusters and public policies associated with successful cluster development is therefore of current relevance

Clustering for 21st Century Prosperity identifies best practices with regard to goals structures instruments modes of operation synergies across private and public programs funding mechanisms and levels and evaluation efforts The committee under the Board on Science Technology and Economic Policy STEP is reviewing selected state and regional efforts to capitalize on federal and state investments in areas of critical national needs This review includes both efforts to strengthen

existing industries as well as specific technology focus areas such as nanotechnology stem cells and advanced energy in order to better understand program goals challenges and accomplishments As part of this study the committee is convening a series of public workshops and symposia involving responsible local state and federal officials and other stakeholders Drawing from discussions at these symposia fact finding meetings and commissioned analyses of existing state and regional programs and technology focus areas the committee will subsequently produce a final report with findings and recommendations focused on lessons issues and opportunities for complementary U S policies created by these state and regional initiatives
