Responsibility Michael Blowfield, Mick Blowfield, Alan Murray, 2014 This textbook examines the multiple dimensions to corporate responsibility creating a framework that presents a historical and interdisciplinary overview of the field a summary of different management approaches and a review of the key actors and trends worldwide [Corporate Responsibility](#)

[Coalitions](#) David Grayson, Nelson Jane, 2017-09-08 The significance of business led corporate responsibility coalitions is indisputable The WBCSD has 200 member companies with combined annual revenues of US 7 trillion the UN Global Compact has almost 8 000 corporate members over two thirds of them from developing countries It is estimated that there are more than 110 national and international generalist business led CR coalitions But there is now urgent need for informed

and balanced analysis of their achievements their progress and their potential Why did these coalitions start and grow What have been their impacts Where are they heading now Where should they be going What is the future In a period of austerity the business and public sector must decide whether funding these coalitions is a priority To meet current crises there will have to be a great deal more business involvement but efforts of individual corporations will not be sufficient There is also a need for far more collective action among companies and more collaborative action between different sectors of society Business led CR coalitions with their decades of convening experience could play an important role in this process if they are fit for purpose going forward Authors David Grayson and Jane Nelson have been actively involved in such coalitions for decades In *Corporate Responsibility Coalitions* they first explore the past present and future of these coalitions the emergence of new models of collective corporate action over the past four decades the current state of play and the increasing number diversity and complexity in terms of how they not only network with each other but also engage in a much broader universe of institutions that are promoting responsible business practices In addition the book provides in depth profiles of the most strategic effective and long standing coalitions including Business for Social Responsibility Business in the Community CSR Europe Instituto Ethos International Business Leaders Forum the UN Global Compact and the WBCSD This book will be required reading for key supporters and potential partners of such coalitions in companies governments international development agencies foundations non governmental organizations academic institutions and think tanks It also aims to inspire a future generation of leaders to be more aware of the role of business as a partner in driving more inclusive green and responsible growth and to help them develop new types of leadership skills so that they can be effective in finding multi stakeholder solutions to complex and systemic challenges
