About Slack

Slack is a workplace collaboration hub that unites teams, information, and tools in one place for a more efficient flow of work. Slack started using Culture Amp in 2015 when they had just two offices. As Slack continues to scale up, feedback and communication are critical in maintaining their culture. We spoke with Dawn Sharifan, VP of People and Sheela Subramanian, Senior Director of Strategic Planning and Programs to learn how Culture Amp helps drive smarter people decisions.

Meet Dawn

Dawn joined Slack at 150 employees as a founding people leader. Today, Dawn oversees the people partners, people operations, organizational effectiveness, and diversity & inclusion teams. According to Dawn, "Culture Amp sits right at the center of all of these functions."

Meet Sheela

Sheela joined Slack in 2016 as the first Enterprise Marketing leader. From there, she helped build the global marketing organization and now works closely on strategic programs with Slack's CMO.

"My role today involves ensuring our team has the support and tools they need to thrive. It's hard to measure that – it's not a simple yes or no checkbox – so we use Culture Amp to measure whether we're headed in the right direction and doing our job effectively."

Key challenges

Company culture is Slack's North Star – the thread that binds together everything they do. But as Slack scaled, Dawn found it hard to maintain the same level of intimacy and communication. "When you get bigger it becomes harder to give feedback. We needed to find a way to formalize feedback and still remain personal enough to build that foundation of trust."

In the face of exponential growth, Slack needed a scalable solution to identify insights and ensure employees had the right resources to do their job effectively. Beyond the demands of rapid growth, the COVID-19 pandemic presented a new set of challenges for the Slack team to navigate.

Rodney Scott, Ross Boyd, 2022-03-08 New Zealand's deceptively simple but effective program to improve public services New Zealand has long been considered at the forefront of public administration experimenting with new ways of organizing and delivering public services Even so successive New Zealand governments had mixed results from using traditional public management tools to lift the performance of the public service and address persistent problems that required multi agency action In 2012 the government decided to try something different As part of a reform package called Better Public Services the government challenged the public service to organize itself around achieving just ten results that had proven resistant to previous interventions The plan was deceptively simple set ambitious targets and publicly report on progress every six months hold small groups of public managers collectively responsible use lead indicators and learn from both success and failure This book explores how and why the New Zealand government made progress and how the program was able to create and sustain the commitment of public servants and unleash the creativity of public entrepreneurs The authors combine case studies based on the experience of people involved in the change together with public management research They explain how ambitious targets and public accountability were used as levers to overcome the bureaucratic barriers that impeded public service delivery and how data evidence and innovation were used to change practice New Zealand experimented failed succeeded and learned from the experience over five years This New Zealand experience demonstrates that interagency performance targets are a potentially powerful tool for fostering better public services and thus improving social outcomes
