Alan Warwick Palmer

Boac A History:

Speedbird Robin Higham,2013-05-30 Between 1939 and 1946 BOAC the British Overseas Airways Corporation was the nationalised airline of Great Britain and between 1946 and 1974 as such it exclusively operated all long haul British flights With its iconic Speedbird logo and its central role in the glamorous jet age of the 1950s and 1960s BOAC achieved a near cult status with admirers around the globe Yet to date there has been no comprehensive history of the organisation covering its structure fleet and the role it played in the critical events of the age from World War II to the end of empire a period when BOAC played a pivotal part in projecting British political power even as that power was waning During World War II BOAC operated a limited wartime service and prepared for the return of commercial flight in the postwar era But it was in the service of Britain s colonies and latterly the process of decolonisation that BOAC achieved its most pivotal role The development of flight technology enabled much faster connections between Britain and her imperial possessions as the colonies prepared for independence BOAC ferried diplomats politicians and colonial administrators between London and the far flung corners of Africa and Asia in much faster times than had previously been possible In this book acclaimed historian Robin Higham presents a unique comprehensive study of BOAC from the early jet travel of the de Havilland Comet and the Vickers VC10 to the dawn of supersonic passenger aviation Highly illustrated and meticulously researched using previously unseen sources this book will be essential reading for all aviation enthusiasts and anyone interested in the history of modern Britain

BOAC Charles Woodley,2004 This is the story of Britain s post war national airline The British Overseas Aircraft Corporation was founded during the Second World War as the successor to Imperial Airways It was an innovative airline the first to fly commercial jets the first to have Concorde and its network straddled the world

Pictorial History of Boac and Associated Airlines Roy James,2004-06 This comprehensive work covers the story of the UKs long range carrier from formation in 1939 until the the creation of British Airways in 1972 It also examines the history of over 34 associated companies and features numerous photographs in a landscape format

The British Overseas Airways Corporation Graham M. Simons,2018

History of Air Cargo and Airmail from the 18th Century Camille Allaz,2005-03 It was first published in French by the Institut du Transport Aerien in 1998 and received very favourable reviews Through the publication of the English language edition this remarkable work is now accessible to many more readers around the world In addition the author has expanded the book with new sections and he has extensively updated it to bring the story of air cargo into the twenty first century concluding with a look into the future The author Camille Allaz served as Senior Vice President Cargo at Air France for 10 years which gave him an insider s close up view of his subject a privilege not enjoyed by many historians There is no aspect of mail or cargo transport by air that has not been thoroughly researched and documented by Allaz from the first brief transport of animals by balloon in France in 1783 to the vast global networks of the integrated express carriers in the 21st century As a true scholar he fits his narrative into the larger framework of political

military economic and aviation history This book should stand for years as the definitive work on the history of air cargo and airmail and will be of immense value to the academic community to the air cargo industry the postal services and to the general public

A History of Aviation at Brooklands in 100 Objects Nigel Spooner, 2024-07-30 At the dawn of the twentieth century mankind had not yet achieved powered flight The main motive power then was provided by steam engines heavy dirty and inefficient If one wanted to travel over seas one had to travel on them A journey from London to New York by steam driven train and ship took more than 6 days By the time the same century drew to a close in December 1999 air travel was the normal choice for long journeys Millions of people every day flew comfortably and safely in pressurised aluminium airliners propelled by simple clean and efficient gas turbine engines The same journey from London to New York could be achieved at supersonic speed in less than 6 hours For much of that century many of the extraordinary developments that moved aviation from fragile wood and fabric biplanes to supersonic transports were achieved on 330 acres of low lying former estate farmland in Surrey England The estate was called Brooklands Those marshy acres were transformed from 1907 into the world's first custom built motor racing circuit then a rapidly developing aerodrome and finally one of the country's largest aircraft factories employing tens of thousands of people Nearly 19 000 aircraft of many different types were built at Brooklands during nine decades of peace and war By the 1980s however it was being eclipsed by larger manufacturing sites elsewhere with longer runways and better communications links its owner by then called British Aerospace finally closed the factory in 1989 This book tells the history of those amazing developments through 100 of the key aircraft engines places and other objects that can still be seen either in or near Brooklands Museum or in other locations around the country It also highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from Camel to Concorde Fury to Harrier Wellington to Viscount Merlin to Olympus Between them Thomas Sopwith Barnes Wallis Rex Pierson Sydney Camm Stanley Hooker and George Edwards were responsible for much of what was designed built and flown not only at Brooklands but elsewhere too The book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish It is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them

manufactured by the men who would make Concorde the Rolls Royce powered Vickers VC10 and its larger variant the Super VC10 represented the ultimate in 1960s subsonic airliners The VC10 was Britain's answer to the Boeing 707 and the Douglas DC 8 but it could take off in a very short distance climb more steeply and land at slower speed than its rivals These were vital safety benefits in the early years of the jet age At one stage the Super VC10 was the biggest airliner made in Europe and the fastest in the world On entry into service both the VC10 and the longer Super VC10 carved out a niche with passengers who enjoyed the speed silence and elegance of the airliner Pilots meanwhile loved its ease of flying and extra power Yet the VC10 project was embroiled in machinations across many years and more than one government Questions were asked in parliament and the whole story was enmeshed in a political and corporate affair that signified the end of British big airliner production Yet the men who made the VC10 also went on to design and build Concorde Many VC10 pilots became Concorde pilots In service until the 1980s with British Airways and until 2013 with the RAF the VC10 became a British icon and a national hero one only eclipsed by Concorde It retains a place in the hearts and minds of enthusiasts the world over A good one stop reference to the VC10 Scale Aviation Modeller International [The Journal of History](#) ,1963 **Flight** ,1909
