Body Of This Death:

This Body of Death Eileen Sperry, 2025-12-15 This *Body of Death* explores how the lyric poetry and other nonnarrative literary forms of early modern England shape our understanding of what it means to be mortal. Previous studies of the nature of death in this period have looked almost exclusively at narrative source material, plays, theological accounts, historical reports. Those narrative forms consequently have emphasized death, the narrative dimension of mortality, an event in time, life's climactic ending. Eileen Sperry looks instead to lyric forms which embrace nonlinear modes of time and argues these texts reveal an aspect of mortality best described as decay, the material instability of the body in the here and now. Chapters explore expressions of decay in works by William Shakespeare, Edmund Spenser, John Donne, and Hester Pulter through subjects like temperance, poetic immortality, the temporality of grief, and bodily resurrection, all of which capture decay's presence across a variety of experiences. These early modern lyrics and the model of decay that emerges from them are read in conversation with contemporary disability studies and the work of theorists like Tobin Siebers, Alison Kafer, David Mitchell, and Sharon Snyder. Disability theory offers an essential framework for understanding how the forms of texts shape the meaning we assign to bodies of all kinds. Bringing together disability studies, lyric studies, and new formalist methods, *This Body of Death* reveals new ways of thinking about what it means to die.

Death and the Body in the Eighteenth-Century Novel Jolene Zigarovich, 2023-01-10 *Death and the Body in the Eighteenth Century Novel* demonstrates that archives continually speak to the period's rising funeral and mourning culture, as well as the increasing commodification of death and mourning, typically associated with nineteenth-century practices. Drawing on a variety of historical discourses such as wills, undertaking histories, medical treatises, and textbooks, anatomical studies, philosophical treatises, and religious tracts and sermons, the book contributes to a fuller understanding of the history of death in the Enlightenment and its narrative transformation. *Death and the Body in the Eighteenth Century Novel* not only offers new insights about the effect of a growing secularization and commodification of death on the culture and its productions, but also fills critical gaps in the history of death, using narrative as a distinct literary marker. As anatomists dissected, undertakers preserved, jewelers encased, and artists figured the corpse, so too the novelist portrayed bodily artifacts. Why are these morbid forms of materiality entombed in the novel? Jolene Zigarovich addresses this complex question by claiming that the body itself, its parts, or its preserved representation functioned as secular memento, suggesting that preserved remains became symbols of individuality and subjectivity. To support the conception that in this period notions of self and knowing center upon theories of the tactile and material, the chapters are organized around sensory conceptions and bodily materials such as touch, preserved flesh, bowel, heart, wax, hair, and bone. Including numerous visual examples, the book also argues that the relic represents the slippage between corpse and treasure, sentimentality and materialism, and corporeal fetish and aesthetic accessory. Zigarovich's analysis compels us to reassess the eighteenth-century response to and representation of the dead and dead like

body and its material purpose and use in fiction In a broader framework *Death and the Body in the Eighteenth Century Novel* also narrates a history of the novel that speaks to the cultural formation of modern individualism *Out-of-Body and Near-Death Experiences* Michael N. Marsh,2010-01-21 Discrediting mystical or psychical interpretations of out of body and near death experiences Michael Marsh demonstrates how these phenomena are explicable in terms of brain neurophysiology and its neuropathological disturbances and discusses the theological and philosophical implications of his hypotheses

Death, Modernity, and the Body Eva Åhrén,2009 Originally published in Swedish in 2002 *Death Modernity and the Body* explores the impact of modernization on customs and practices surrounding the dead body in Sweden in the late nineteenth and early twentieth centuries This period of intense social and cultural change transformed Sweden from an agricultural society to a modern industrial state The book focuses on five arenas medical research and education displays of the dead body for entertainment purposes funerary preparations of the body memorial photography and cremation The book takes an original approach to the history of death in modern society by focusing on the dead body in intersecting cultural domains Medical scientific and technological history are thereby connected to popular culture social and political history as well as ethnography and anthropology The scholarly literature on the history of death is disproportionately focused on the Anglophone world France and Germany This study contributes to the scholarship by examining the case of Sweden where modernization was exceptionally rapid and pervasive and full of interesting particularities Book Jacket **Sermons**
