**Business Cycles** Wesley Clair Mitchell, 1913      **Business Cycles** Wesley Clair Mitchell, 1956      **Business Cycles** Wesley Clair Mitchell, 1927      **Business cycles** Wesley C. Mitchell, 1954      *Business Cycles: The problem and its setting* Wesley Clair Mitchell, 1927      Business Cycles Wesley Clair Mitchell, 1936      *Business Cycle Theory, Part I Volume 1* Harald Hagemann, 2024-08-23

These volumes contain key texts from the period 1860-1939 on Business Cycle Theory. It covers a long list of Anglo-Saxon writers as well as the most important contributions from the French, German, Italian, Russian, and Swedish debates. The older business cycle theories presented here richly elucidate the complex interaction between real, monetary, and structural change factors in economic systems, the close association between historical and analytical methods, providing a fertile source of inspiration for current researchers in the field. In Volume I of this edition, a number of chapters from early classics are presented. After 1860, the idea of a regular business cycle, formulated by Clément Juglar, was increasingly recognised as a recurrent phenomenon. This edition begins with Juglar's analysis of crises from a monetary standpoint and John Stuart Mill's analysis of the role of an excessive credit expansion as a characteristic and fuel for speculation. Also included are two key chapters of Marx's work: his growth model as it is specified in the extended schemes of reproduction and his comments on crisis theory. The final sections present key chapters by Jevons on his theory of sunspots, Hobson and Mummery's linking of depressions in trade with insufficient consumption and excessive thrift, Marshall on price fluctuations as the prevailing endogenous characteristic of cyclical fluctuations and his belief in the existence of a ten-year cycle, Mitchell's analysis of the imbalance between costs and prices that develops over the cycle, Kitchin's distinction between movements of economic variables composed of either major or trade cycles and minor cycles averaging 40 months, and Kuznets' attempt to give a rationale to the secondary secular movements he discovered.

Theorists of Economic Growth from David Hume to the Present W. W. Rostow, 1992-09-24

This history of theories and theorists of economic growth elucidates the economic theory, economic history, and public policy observations of the renowned scholar W. W. Rostow. Looking at the economic growth theories of the classic economists up to 1870, Rostow compares Hume and Adam Smith, Malthus and Ricardo, and J. S. Mill and Karl Marx. He then examines the period 1870-1939 and its economic theorists, including Schumpeter, Colin Clark, Kuznets, and Harrod, and surveys the three forms of growth analysis in the postwar era: formal models, statistical morphology, and development theories. This authoritative overview also includes an agenda of unresolved problems in growth analysis and a description of the five major tasks statesmen will confront over the next several generations.
