Business planning

Quick Summary

- A business plan is a living document that gives your business clear direction in its journey towards growth containing a range of documents from marketing and sales strategies to financial forecasts
- The plan needs to include a range of different topics and requires a great deal of planning and consideration
- A business plan can be used internally or aimed externally to help 'sell' your business to outside investors.

Introduction

Benjamin Franklin once said "By failing to prepare, you are preparing to fail" – this is also true when managing a business. A business plan is a written document that describes a business, its objectives, strategies, the market it lives in and financial forecasts. It has many functions, from securing external funding to measuring success and monitoring progress of your business. Without this plan, your business is likely to not succeed or at the very least, not reach its true potential.

Writing the plan down helps to clarify your thinking and identifies where you intend to get to and how you intend to get there. However, once the plan has been thought out, it shouldn't be forgotten about. You should review your progress against your business forecast regularly throughout the year, and make any necessary adjustments to get you back on track if necessary.

A business plan is a living document that needs updating and changing as your business grows. Having a clearly presented document will also make it easier for any specialist you may use to provide support. In the case of raising funds from a bank or investor a business plan will be a necessary requirement.

Business Planning: a Guide to Business Start-Up David Butler, 2016-03-30. A readable and structured guide for the increasing numbers of people each year who consider setting up a small business or becoming self-employed. Business Planning outlines the options and risks involved in setting up a business. The importance of thorough planning is often overlooked and only becomes evident if the business fails. This is highlighted in a recent study by the SFEDI of 486 bankers and accountants where lack of planning was the most common reason cited as to why businesses fail. Business Planning shows how to avoid this failure by focusing on the planning stage and building on this framework as the business develops. This is the only book based around the Small Firms Enterprise Development Initiative (SFEDI) for first-time owner-managers. It contains all the underpinning factual information required to prepare and present a successful Business Plan for presentation to a bank manager or an alternative potential source of finance or for use in an NVQ portfolio. It is in line with the major syllabuses for Business Start-Up and can be used as a course book for anyone completing a formal NVQ level 3 qualification in this area, with tips on NVQ structure and assessment.

Business Planning Sorin Dumitrascu,2016-12-21 Preparing a Business PlanThere are four main benefits of preparing a business plan It helps you clarify what developments your business should focus on It also gives you a framework within which to develop your business strategies It acts as a benchmark against which actual performance can be measured and it gives you influence over the direction your business or department takes Business plans differ from strategic plans Business plans are created by start ups and established businesses alike However business plans created by the latter are usually exclusively for internal use Your business plan should include four main elements It should describe the opportunity it addresses and then the solution you ve come up with It should then detail the plan s execution and finally it should include the desired outcomes of the plan Once you ve considered each element you can create a narrative from them Preparation is of great importance when developing a business plan Prepare for the development by discussing thinking researching and analyzing your business ideas There are six steps you should take when preparing to develop your business plan The first of these is defining your mission The second step is doing research to identify key issues related to your idea The next step is establishing goals Next you need to identify strategies to achieve your goals And finally you ll assess resources and identify risks Your business plan will vary depending on its purpose It typically comprises four major parts These are the executive summary the market opportunity the implementation and the contingencies Complete each of these with your target audience in mind

Performing Key AnalysesA business plan will typically include an executive summary information on market opportunities the implementation details of the plan and any necessary contingencies due to unexpected changes in market conditions Benefits to performing situational analyses include informing the future direction of your business plan identifying resources and capabilities and allowing you to explore any potential issues that may arise When conducting an internal analysis there are four areas to consider assessing market strategy assessing resources evaluating organizational and management strategy and evaluating your organization s financial position An external analysis of a business environment includes careful consideration of political economic societal and technological factors otherwise known as a PEST analysis Scenario planning takes these important factors and examines how a business plan might change under different political economic societal and technological circumstances A market analysis consists of identifying customer groups inspecting the industry and analyzing the competitors within that industry A SWOT analysis uses information from your internal and external analyses to define

strategies to maximize competitive advantage The internal analysis identifies strengths and weaknesses in your company s strategy resources and financial position An external analysis will provide information on the political economic societal and technological environment It will also outline customer needs competitors capabilities and industry trends Preparing for Implementation You should view the planning implementation and control phases of a business plan as part of a continuous strategic process This should help you implement it successfully and achieve real benefits To coordinate the implementation of your business plan you should follow a number of steps First develop action plans that outline the tasks that need to be completed Next ensure that implementation can be supported in your organization Create a reporting system to help you monitor progress Be sure you can control and modify your plans And finally assess the outcomes Good Small Business Planning Guide John Kirwan,2009-09-15 A practical down to earth and reader friendly guide for owners of small businesses who want to organise develop or grow their business
