complete an application etc These and similar questions that people ask consciously or not openly or not are decisions What
skills must we master especially when there is a need to make not only elementary decisions but also decisions that affect the
existence health and even lives of people First Laszlo Zsolnai writes that we should acquire the skill of gaining knowledge
Only then will we stand a chance of reacting to things that are improbable today but could become a fact tomorrow Also
essential is the skill of designing i e preparing actions conceptually in order to make decisions before irreversible changes
occur Finally it is essential to master the skill of multidimensional judgment within the space defined by effectiveness

Therefore the model is much broader than purely an analytical framework would be It must tell us how to act rather than
limit us to reflection on actions already performed it must combine decision and praxiological analysis of human conduct The
proposed model enlarges the scope of the debate and suggests new avenues of both rational and responsible decision making
