Burned by Billionaires Chuck Collins, 2025-10-07 A scathing exposé of the hidden impact of America's ultra wealthy on our social economic political and ecological landscape as well as a path toward a more equitable future The three hundred largest yachts in the world emit as much carbon dioxide as the ten million inhabitants of Burundi from *Burned by Billionaires* Recently it has become increasingly evident that extreme concentrations of wealth and power have profound impacts on our politics but extreme inequality's influence on our daily lives and our futures has been vastly overlooked In *Burned by Billionaires* author and a senior scholar at the Institute for Policy Studies in Washington DC Chuck Collins chronicles how the actions of the top 0.1% have severe consequences for the rest of us especially those of marginalized identities Collins takes down the myth of meritocracy unraveling how the rich rig the game in their favor resulting in a concentration of wealth in the hands of a tiny but growing class of billionaires leading to both intense income and political polarization In a wholly original argument Collins charts this economic social and ecological destruction and shows how these effects manifest in every facet of our society including Increasing the tax burden on ordinary working people Reducing public funding for schools roads and other essential infrastructure Shrinking the pool of affordable housing especially in poor and urban areas Accelerating climate change and dictating what ends up on our dinner plate Shaping the news we consume and fueling the spread of misinformation Collins argues that perhaps worst of all the concentration of wealth and power is leading to political hijacking undermining the democratic principle that our votes matter equally Full of engrossing charts graphs political

cartoons and more this book is an urgent call to action and road map to a more equitable society where everyone has access to the resources that will allow them to thrive and one where it is no longer commonplace to live in a constant state of uncertainty fear and anxiety Burned by Billionaires offers a pointed prescription for taking power back from the billionaire class and achieving the shared prosperity that comes from a healthy and equal society Plunder Brendan

Ballou,2023-05-02 The infuriating illuminating essential Kurt Anderson expos of private equity what it is how it kills businesses and jobs how the government helps and how we stop it Private equity surrounds us Firms like Blackstone Carlyle and KKR are among the largest employers in America and hold assets that rival those of small countries Yet few understand what these firms are or how they work In Plunder Brendan Ballou explains how private equity has reshaped American business by raising prices reducing quality cutting jobs and shifting resources from productive to unproductive parts of the economy Ballou vividly illustrates how many private equity firms buy up retailers medical practices prison services nursing home chains and mobile home parks among other businesses using little of their own money to do it and avoiding debt and liability for their actions Forced to take on huge debts and pay extractive fees companies purchased by private equity firms are often left bankrupt or shells of their former selves with consequences to communities that long depended on them Perhaps most startling is Ballou s insight into how this is happening with the active support of various arms of the government But as Ballou reveals in an agenda for reining in the industry private equity can be stopped from wreaking further havoc *Transforming the Federal Housing Administration for the 21st Century* United States.
