Lateralization and cognitive systems Sebastian Ocklenburg,Christian Beste,Onur Gunturkun, Marco Hirnstein,2015-02-24
Left right asymmetries of structure and function are a common organization principle in the brains of humans and non human vertebrates alike While there are inherently asymmetric systems such as the human language system or the song system of songbirds the impact of structural or functional asymmetries on perception cognition and behavior is not necessarily limited to these systems For example performance in experimental paradigms that assess executive functions such as inhibition planning or action monitoring is influenced by information processing in the bottom up channel Depending on the type of stimuli used one hemisphere can be more efficient in processing than the other and these functional cerebral asymmetries have been shown to modulate the efficacy of executive functions via the bottom up channel We only begin to understand the complex neuronal mechanisms underlying this interaction between hemispheric asymmetries and cognitive systems Therefore it is the aim of this Research Topics to further elucidate how structural or functional hemispheric asymmetries modulate perception cognition and behavior in the broadest sense **Creating Responsible and Inclusive**

[Patent Office Record and Register of Copyrights and Trade Marks](#) ,1910 **Incredible Women** Eilidh Galbraith,2026-03-06
This book explores the gender pain gap the systemic disparities in how women s chronic pain and illness are perceived believed and treated Focusing especially on conditions without visible markers Eilidh Galbraith examines why women s pain remains socially culturally and theologically problematic Through interdisciplinary analysis and qualitative storytelling she

investigates how power dynamics shape medical responses and influence women's credibility as narrators of their own suffering. Drawing on feminist theology, trauma studies, and health research, Galbraith weaves together her own experiences with those of other women to reveal how silence and disbelief impact health outcomes and identity. This deeply personal study challenges dominant narratives and calls for a more compassionate, justice-oriented approach to women's pain. **The Canadian Patent Office Record** Canada. "You Just Need to Lose Weight" Aubrey Gordon, 2023-01-10. A NEW YORK TIMES BESTSELLER. AN INDIE BESTSELLER. One of the great thinkers of our generation. I feel fresher and smarter and happier for sitting down with her. Jameela Jamil iWeigh Podcast. The co-host of the Maintenance Phase podcast and creator of Your Fat Friend equips you with the facts to debunk common anti-fat myths and with tools to take action for fat justice. The pushback that shows up in conversations about fat justice takes exceedingly predictable form. Losing weight is easy: calories in, calories out. Fat people are unhealthy. We're in the midst of an obesity epidemic. Fat acceptance glorifies obesity. The BMI is an objective measure of size and health. Yet these myths are as readily debunked as they are pervasive. In *You Just Need to Lose Weight*, Aubrey Gordon equips readers with the facts and figures to reframe myths about fatness in order to dismantle the anti-fat bias ingrained in how we think about and treat fat people. Bringing her dozen years of community organizing and training to bear, Gordon shares the rhetorical approaches she and other organizers employ to not only counter these pernicious myths but to dismantle the anti-fat bias that so often underpins them. As conversations about fat acceptance and fat justice continue to grow, *You Just Need to Lose Weight* will be essential to ensure that those conversations are informed, effective, and grounded in both research and history. **Scientific Canadian Mechanics' Magazine and Patent Office Record** Canada. Stripped Maggie M. Werner, 2020-10-14. *Stripped* examines the ways in which erotic bodies communicate in performance and as cultural figures. Focusing on symbols independent of language, Maggie M. Werner explores the signs and signals of erotic dance, audience responses to these codes, and how this exchange creates embodied rhetoric. Informed by her own ethnographic research conducted in strip clubs and theaters, Werner analyzes the movement, dress, and cosmetic choices of topless dancers and neo-burlesque performers. Drawing on critical methods of analysis, she develops approaches for interpreting embodied erotic rhetoric and the marginal cultural practices that construct women's public erotic bodies. She follows these bodies out into the streets, into the protest spaces where sex workers and anti-rape activists challenge discourses about morality and victimhood, and struggle to remake their own identities. Throughout, Werner showcases the voices of these performers, and in the analyses, shares her experiences as an audience member, interviewer, and paying customer. The result is a uniquely personal and erudite study that advances conversations about women's agency and erotic performance, moving beyond the binary that views the erotic body as either oppressed or empowered. Theoretically sophisticated and delightfully intimate, *Stripped* is an important contribution to the study of the rhetoric of the body and to

rhetorical and performance studies more broadly *The South African Law Reports. Appellate Division* Sir Alexander Fraser Russell, Gerard Molyneux Swift, Reginald Craufurd Streeten, F. W. A. Gray, 1919

Body Dissatisfaction and Its Relationship with the Perceptual Effects of Exposure to Bodies and Attentional Biases Toward Bodies Rebecca Glauert, 2008

Truncated abstract Socio cultural processes are often cited as one of the main causes of body dissatisfaction amongst women Numerous studies have found that exposure to thin idealized images in the media increases women s body dissatisfaction The central aims of this thesis are to investigate how exposure to thin and fat bodies alters womens perceptions of body normality and body ideals whether body dissatisfaction is related to these changes and whether body dissatisfaction is associated with an attentional bias toward thin bodies In Chapter 1 I review the main theories dominating body dissatisfaction research In Chapter 2 I present two studies which investigate how exposure to thin and fat bodies influences perceptions of body normality and ideal body size Women who varied on a measure of body dissatisfaction Experiment 1 2 and awareness and acceptance of societal standards of beauty Experiment 2 rated a range of computer generated bodies varying in simulated BMI for how normal Experiment 1 2 and ideal they looked Experiment 2 They were then exposed to either thin or fat bodies and they re rated the bodies Increased levels of body dissatisfaction and internalisation of societal standards of beauty were related to a thinner most normal and ideal rated body before any exposure as well as a greater discrepancy between the most normal and ideal rated bodies Both Experiments 1 2 revealed that brief exposure to thin or fat bodies altered women s perceptions of body normality and body ideal where exposure to fat bodies made womens perceptions of a normal and ideal body fatter and exposure to thin bodies made perceptions of the most normal and ideal rated body thinner In Chapter 5 I present normative data for the Body Shape Questionnaire 34 a measure of dissatisfaction with body weight and shape Cooper et al 1987 from an Australian university sample Many researchers use university samples iv when investigating body dissatisfaction so it is useful to have normative data for such a sample One thousand and fifty two women aged between 16 and 30 completed the BSQ 34 A mean score of 94 4 SD 34 5 was found with a range of 34 203 My scores are comparable with those found in an American undergraduate sample and are significantly higher than those found in community undergraduate and clinical samples in the UK and Italy Results indicate that levels of body dissatisfaction may be higher in Australia than in the UK and Italy Together these studies provide some important new findings 1 Body dissatisfaction and internalisation of societal standards of beauty are related to thinner body norms and ideals 2 Women s perceptions of normal and ideal female body sizes can be readily altered by exposure to thin and fat bodies and 3 women selectively attend to thin bodies but the more dissatisfied she is with her own body the less she attends to thin bodies Potential implications of these results for the treatment of body dissatisfaction may include the incorporation of treatment programs which target not only unnaturally slim body ideals but perceptions of what constitutes a normal body as well as trying to alter selective attention toward thin bodies in the environment The results may also highlight to the media

that consistently showing ultra slim models will very likely affect women's perceptions of normal and ideal female body sizes
