[Bodies in the Bog and the Archaeological Imagination](#) Karin Sanders, 2009-12 Over the past few centuries northern Europe's bogs have yielded mummified men, women, and children who were deposited there as sacrifices in the early Iron Age and kept startlingly intact by the chemical properties of peat. In this remarkable account of their modern afterlives, Karin Sanders argues that the discovery of bog bodies began an extraordinary and ongoing cultural journey. Throughout the nineteenth and twentieth centuries, Sanders shows these eerily preserved remains came alive in art and science as material metaphors for such concepts as trauma, nostalgia, and identity. Sigmund Freud, Joseph Beuys, Seamus Heaney, and other major figures have used them to reconsider fundamental philosophical, literary, aesthetic, and scientific concerns. Exploring this intellectual spectrum, Sanders contends that the power of bog bodies to provoke such a wide range of responses is rooted in their unique status as both archaeological artifacts and human beings. They emerge as corporeal time capsules that transcend archaeology to challenge our assumptions about what we can know about the past. By restoring them to the roster of cultural phenomena that force us to confront our ethical and aesthetic boundaries, *Bodies in the Bog* excavates anew the question of what it means to be human.

[Bog Bodies Uncovered: Solving Europe's Ancient Mystery](#) Miranda Aldhouse-Green, 2015-09-08 The grisly story of the bog bodies updated via details of archaeological discovery and crime scene techniques. Some 2,000 years ago, certain unfortunate individuals were violently killed and buried not in graves but in bogs. What was a tragedy for the victims has proved an archaeologist's dream for the peculiar and acidic properties of the bog have preserved the bodies so that their skin, hair, soft tissue, and internal organs even their brains survive. Most of these ancient swamp victims have been discovered in regions with large areas of raised bog: Ireland, northwest England, Denmark, the Netherlands, and northern Germany. They were almost certainly murder victims, and as such, their bodies and their burial places can be treated as crime scenes. The cases are cold, but this book explores the extraordinary information they reveal about our prehistoric past.

*Bog Bodies Uncovered* updates Professor P. V. Glob's seminal publication *The Bog People*, published in 1969, in the light of vastly improved scientific techniques and newly found bodies. Approached in a radically different style, akin to a criminal investigation, here the bog victims appear uncannily well preserved. In full-page images that let the reader get up close and personal with the ancient past.

**The Bog People** P. V. Glob, 2004-08-31 One spring morning, two men cutting peat in a Danish bog uncovered a well-preserved body of a man with a noose around his neck. Thinking they had stumbled upon a murder victim, they reported their discovery to the police, who were baffled until they consulted the famous archaeologist P. V. Glob. Glob identified the body as that of a two-thousand-year-old man.
