Dynamics of Windfield-Source-Basin System Zaixing Jiang,2018-03-06 This book introduces the geological concept of the windfield source basin system based on integrated modern and ancient sedimentology studies It identifies wind field as a main sedimentation controlling factor that combines with provenance and basin dynamics to determine the formation and distribution of depositional systems Using the unary properties of facies sedimentary models and the duality properties of source to sink approaches the concept of a wind source basin system introduces the sedimentary system trinity wind field

provenance and basin properties Wind source basin systems provide more plausible genetic interpretations of depositional systems including both continental and marine facies and clastic and carbonate systems as well as more comprehensive and precise predictions of depositional systems hydrocarbon reservoirs in unknown regions Further the book proposes a series of methods on paleowind field reconstruction which fill the gaps in paleo atmospheric field studies in paleoclimatology and shows that allocating relationships among source reservoir cap in petroliferous basins are limited by the wind source basin system This trinity system also provides a new perspective on petroleum geology assessment The book appeals to all those engaged in sedimentology petroleum geology and climatology studies
