**Body Work** Julia Coffey, 2016-03-10 The rise of the health beauty and fitness industries in recent years has led to an increased focus on the body Body image gender and health are issues of long standing concern in sociology and in youth studies but a theoretical and empirical focus on the body has been largely missing from this field This book explores young people s understandings of their bodies in the context of gender and health ideals consumer culture individualisation and image Body Work examines the body in youth studies It explores paradoxical aspects of gendered body work practices highlighting the contradiction in men s increased participation in these industries as consumers alongside the re emphasis of their gendered difference It explores the key ways in which the ideal body is currently achieved via muscularising practices slimming regimes and cosmetic procedures Coffey investigates the concept of health and how it is inextricably linked both to the bodily performance of gender ideals and an increased public emphasis on individual management and responsibility in the pursuit of a healthy body This book s conceptual framework places it at the forefront of theoretical work concerning bodies affect and images particularly in its development of Deleuzian research It will appeal to a wide range of scholars and students in fields of youth studies education sociology gender studies cultural studies affect and body studies
