B 52 Stratofortress jet was the USA's first long range swept wing heavy bomber. It began life as an intercontinental high altitude Cold War nuclear bomber. With each new variant the B 52 increased in range, power and capability, seeing active service in the Vietnam War, both Gulf Wars of 1991 and 2003, and over Afghanistan in 2001. Author Steve Davies recalls its combat history, gets up close to look under the skin of the B 52, and talks to the flight crews and maintainers of this legendary aircraft.

Excerpt: The Boeing B 52 Stratofortress is a long range subsonic jet powered strategic bomber designed and built by Boeing and operated by the United States Air Force (USAF). Beginning with the successful contract bid on 5 June 1946, the B 52 design evolved from a straight wing aircraft powered by six turboprop engines to the final prototype YB 52 with eight turbojet engines and swept wings. The Stratofortress took its maiden flight in April 1952. Built to carry nuclear weapons for Cold War era deterrence missions, the B 52 Stratofortress replaced the Convair B 36. Although a veteran of a number of wars, the Stratofortress has dropped only conventional munitions in combat. The B 52 carries up to 70,000 pounds (32,000 kg) of weapons. Its Stratofortress name is rarely used outside of official contexts; it has been referred to by Air Force personnel as the BUFF (Big Ugly Fat Flying Fucker) Fellow. The B 52 has been in active service with the USAF since 1955. The bombers flew under the Strategic Air Command (SAC) until it was disestablished in 1992, and its aircraft absorbed into the Air Combat Command (ACC). This remained the case until February 2010, when all B 52 Stratofortress and B 2 Spirit aircraft were transferred from ACC to the recently established Air Force Global Strike Command (AFGSC). Superior performance at high subsonic speeds and relatively low operating costs have kept the B 52 in service despite the advent of later aircraft, including the Mach 3 North American

BOEING B 52 Walter J. Boyne, 1981. Conceived in 1948, first flown in 1952, and projected still to be in front line service in the 21st century, the Boeing B 52 Stratofortress is one of the most extraordinary aircraft in history. Here is the book to do justice to the story of the development and operational career of this legendary bomber. The book features a comprehensive history of the development of the US heavy bomber and intensive discussion of the Boeing B 47 and its effect upon the B 52 design, and perhaps more important than either of these today, the enormous number of modifications and changes which have kept the aircraft viable. The important contributions of the Strategic Air Command with its concepts of the dedicated crew, rigorous training, and ceaseless evaluation is well covered, and special attention is given to the B 52's role in the Vietnamese conflict. The book is reinforced with over 200 photographs and drawings, and includes a comprehensive set of appendices. The material for the book was derived almost entirely from the primary sources: the men who designed, built, flew

maintained and improved them and the documents created at the time The author a former B 52 and B 47 pilot himself conveys the spirit of the B 52 the men and the missions behind the hardware as well as a superbly detailed analysis of the aircraft itself B-52 Stratofortress vs SA-2 "Guideline" SAM Peter E. Davies,2018-10-18 From Vietnam to Desert Storm this book tells the story of the United States seemingly indestructible heavy bombers and the Soviet designed missile system that attempted to bring them down
