has come at a cost as many problems have emerged as a result in China's economy and society including a dramatic rich-poor gap, labour issues, problems in the banking sector and severe inflation in the cost of housing as well as challenges with respect to China's external trade. The Chinese government recognizes these problems and is taking steps to rebalance its economy and society. The book takes a political economy perspective in order to investigate the interplay between the political system in China and the way in which the economy is structured and the manner in which economic changes take place. Demonstrating that in order for China to achieve sustained economic growth and social improvement it must undertake serious policy changes, it also highlights that if countries are going to deal with China in a stable and productive manner a thorough understanding of key contemporary developments in that country is vital. Covering a range of the most pertinent issues facing China today, this book will be of interest to students and scholars of Chinese Economics, Economic Development and Political Economy.

Unionization and Deunionization John J. Lawler, 1990. The past decade has seen renewed devotion on the part of many unions to the organizing process. Yet management opposition has been equally intense. This book explores the nature of the strategies pursued by unions and management during both new organizing drives and employer deunionization efforts. The elements of well-designed strategies are described within a framework developed by the author. The book addresses a number of crucial issues including the manner in which employers and unions formulate strategies, the specific tactics utilized by both sides and the impact of strategies and tactics on union organizing effectiveness. The study relies both on published research and data assembled by the author. Significant features of the book are its thorough analysis of a variety of nonconventional union organizing tactics, e.g. blitz campaigns, associate membership programs, corporate campaigns in plant strategies, internal organizing, an in-depth examination of the role of labor relations consultants in organizing drives and deunionization efforts, and assessment of the ways in which internal politics inhibit many unions and the ways in which tactics are linked together in a variety of settings. The book provides a comprehensive and wide-ranging treatment of what is known about why and how unions and management act during unionization and deunionization efforts. It should be useful to practitioners and researchers alike.
