

Accounting for Business Decisions – Required Reading

ACCT3 FINANCIAL Chapter 1 (Pg 1-12)

ACCOUNTING PRINCIPLES

- **Historical Cost Principle** → most assets are to be recorded on the balance sheet at their historical cost even if they have significantly increased in value over time.
- **Matching Principle** → this instructs that an expense should be reported in the same period in which the corresponding revenue is earned and is associated with accrual accounting.
- **Revenue recognition** → this is a cornerstone of accrual accounting together with the matching principle. According to the principle, revenues are recognised when they are realised and are earned, no matter when cash is received.
- **Full disclosure** → this is a concept that required a business to report all necessary info about their financial statement and other relevant info to any persons who are accustomed to reading this info.

BEGINNING ASSUMPTIONS

- Accounting is the process of identifying, measuring & communicating economic info to permit informed judgements & decisions. It establishes financial results of a bus. To do this, accountants make the following 4 assumptions:
 - Economic Entity Assumption
- This states that financial activities of a bus. can be separated from the financial activities of the bus.' owners & other bus. activities.
- This allows users to examine a Co's. accounting info. without concern that the info includes personal affairs. → the bus. is the reporting entity & personal activities shouldn't be included w/ bus. activities.
 - Accounting Period Assumption
- Bus. owners & interested parties want periodic measurements of the bus.' financial success or failure.
- For many activities, it's useful to measure performance at regular intervals → determines if you should change your strategy.
- Performance is measured in financial terms. Therefore, accountants assume that economic info can be communicated over short period of time (no longer than 1 yr).
- Although the measurement involved numbers, it requires judgements & estimates.
- Publicly traded Co's. e.g. CSL Limited must file financial statements with the ASX at least twice a year.
 - Monetary Unit Assumption
- Assumes that the dollar is the most effective means to communicate economic activity. It is the 'attribute of interest'.
- The attribute of interest in accounting is the cost in dollars. If an economic activity cannot be expressed in dollars, then it's not recorded in the accounting system.
- This is one of the limitations (and strengths) of accounting. It assumes further that the dollar is a reasonably stable measure.
 - Going Concern Assumption
- The assumption that a bus. will continue to operate into the foreseeable future.
