Thinkerings Georges E. Guibord, 2007-05-11 This book covers a wide variety of subjects ranging from a New World Calendar to Einstein's Theories of Relativity It describes interesting aspects of Astronomy History Philosophy and Life using simple terms that do not require prior knowledge of these matters Several natural phenomena are examined and many scientific aspects of our environment and of life in general are presented The book is full of fascinating information that effectively makes it a short course in basic science and astronomy and an imaginative study of many aspects of human nature A short section on humour provides a relaxing variation from the seriousness of the technical subjects and the controversial nature of the human aspects

New Trends in Allergy IV Johannes Ring, Heidrun Behrendt, Dieter Vieluf, 2012-12-06 There is no doubt among experts that the prevalence of allergic diseases has increased in many industrialized countries in recent years The reasons for this increase are unknown only suppositions exist Many people focus on environmental influences However the assumption that air pollution alone is responsible for this increase seems to be too simple many other influences including the genetic predisposition of individual patients allergen exposure and possibly socioeconomic factors also have to be taken into consideration Although our understanding of the complex mechanisms of allergic diseases has considerably improved thanks to the progress made in experimental immunology and allergology we still have a long way to go before this scientific knowledge is translated into new therapeutic modalities For this reason the scientific community welcomed the gathering of scientists from very different disciplines and different parts of the world at an international symposium New Trends in Allergy IV together with Environmental Allergy and Allergotoxicology III in Hamburg in 1995 This volume contains the invited papers covering a wide range from basic science to practical clinical diagnosis and therapy A further unique feature of this event was the concomitant first official workshop of the Environmental Pollution and Allergy Committee of the International Association of Allergy and Clinical Immunology IAACI at which the state of scientific knowledge in this field was defined and formulated
