KEYWORDS

social cognitive career theory, boundaryless career, career intervention, assessment methods, research methods

Introduction

Due to the rapid changes as a response to the technological innovations in the current society, the original relationship between organizations and employees has become unstable, and a new model of boundaryless career has been established (Arthur and Rousseau, 1996). The boundaryless career model, characterized by complexity, non-linearity, and unpredictability, emphasizes the influence of the environment on individuals. Among the career theories, Social Cognitive Career Theory (SCCT) first added contextual factors to the original model (Lent et al., 1994). Therefore, SCCT seems to be more applicable to the current boundaryless era.

Considering the role of individual cognitive variables (self-efficacy and outcome expectations), learning experiences, and personal interests on career development, SCCT focuses on not only environmental but also individual factors that influence one's career decision making (Lent et al., 1994). The SCCT has good applicability in school career education guidance and provides a comprehensive framework for explaining and predicting career development (Lent and Brown, 2019). The SCCT framework provides a theoretical foundation for career coaching. Compared to other career theories, SCCT offers a new perspective on guiding adolescents' interest formation, professional (career) choice, and performance, with potential for cross-cultural research (Lent et al., 2013).

Therefore, this study aims to present the advantages and challenges of SCCT and propose future research trends. The SCCT approach has the following advantages: firstly, it provides a systematic explanation for career development; secondly, it responds to the development of the times; finally, it focuses on special groups in terms of career counseling. SCCT approach also faces some challenges: lack of qualitative research methods, lack of qualitative assessment methods, and lack of intervention approach. The contribution of the study adds the number of targeted recommendations and strategies as follows: (1) Explore qualitative and quantitative research methods for SCCT; (2) Explore qualitative assessment methods for SCCT; (3) Develop multiple forms of SCCT approach.
