Curriculum Policy:

Curriculum Policy Rob Moore, Jennifer Ozga, 1991 Paperback Throughout the last decade there has been an unprecedented amount of activity in curriculum policy and recent years have seen the acceleration of that activity following the Education Reform Act of 1988 This reader is a selection of work which addresses some of the more complex ideas and debates surrounding curriculum policy The book is divided into three parts the first section describes the background to recent curriculum policy the second section looks at a variety of ways of constructing the curriculum all of which have an impact on policy while the third section offers a series of critiques on current policy in particular the immediate impact of the ERA and of vocationalism of market forces and strong central control

Reinventing the Curriculum Mark Priestley, Gert Biesta, 2013-06-20 Scotland's Curriculum for Excellence offers an example of a different approach to national curriculum development It combines what are claimed to be the best features of top down and bottom up approaches to curriculum development and provides an indication of the broad qualities that school education should promote rather than a detailed description of curriculum content Advocates of the approach argue that it provides central guidance for schools and maintains national standards whilst at the same time allowing schools and teachers the flexibility to take account of local needs when designing programmes of education Reinventing the Curriculum uses Scotland's Curriculum for Excellence as a rich case study analysing the strengths and weaknesses of this approach to curriculum design and development and exploring the implications for curriculum planning and development around the world
