Siddhartha Chatterjee Program Chair Preface The year 1998 marked the eleventh anniversary of the annual Workshop on Languages and Compilers for Parallel Computing LCPC an international forum for leading research groups to present their current research activities and latest results The LCPC community is interested in a broad range of technologies with a common goal of developing software systems that enable real applications

Among the topics of interest to the workshop are language features communication code generation and optimization communication libraries distributed shared memory libraries distributed object systems resource management systems integration of compiler and runtime systems irregular and dynamic applications performance evaluation and debuggers LCPC 98 was hosted by the University of North Carolina at Chapel Hill UNC CH on 7-9 August 1998 at the William and Ida Friday Center on the UNC CH campus Fifty people from the United States Europe and Asia attended the workshop The program committee of LCPC 98 with the help of external reviewers evaluated the submitted papers Twenty four papers were selected for formal presentation at the workshop Each session was followed by an open panel discussion centered on the main topic of the particular session

Kinematic Geometry of Gearing David B. Dooner, 2012-04-09 Building on the first edition published in 1995 this new edition of *Kinematic Geometry of Gearing* has been extensively revised and updated with new and original material This includes the methodology for general tooth forms radius of torsure cylinder of osculation and cylindroid of torsure the author has also completely reworked the 3 laws of gearing the first law rewritten to better parallel the existing Law of Gearing as pioneered by Leonard Euler expanded from Euler's original law to encompass non circular gears and hypoid gears the 2nd law of gearing describing a unique relation between gear sizes and the 3rd law completely reworked from its original form to uniquely describe a limiting condition on curvature between gear teeth with new relations for gear efficiency are presented based on the kinematics of general toothed wheels in mesh There is also a completely new chapter on gear vibration load factor and impact Progressing from the fundamentals of geometry to construction of gear geometry and application *Kinematic Geometry of Gearing* presents a generalized approach for the integrated design and manufacture of gear pairs cams and all other types of toothed motion force transmission mechanisms using computer implementation based on algebraic geometry

Elementary Linear Algebra Bernard Kolman, 1991 This book presents the basic ideas of linear algebra in a manner that users will find understandable It offers a fine balance between abstraction theory and computational skills and gives readers an excellent opportunity to learn how to handle abstract concepts Included in this comprehensive and easy to follow manual are these topics linear equations and matrices solving linear systems real vector spaces inner product spaces linear transformations and matrices determinants eigenvalues and eigenvectors differential equations and MATLAB for linear algebra Because this book gives real applications for linear algebraic basic ideas and computational techniques it is useful as a reference work for mathematicians and those in field of computer science
