14 CHAPTER 2

scrawled notes correctly, she will be able to provide me with the medicine I need. Moral principles are much like prescriptions. If we closely follow their instructions, we will find ourselves acting in morally accept-able ways. A principle such as "Show respect for all persons," for ex-ample, is supposed to influence a fraternity member's behavior toward the coeds at the Homecoming party.

With respect to the element of universalizability, a distinction must be made between abstract moral principles and concrete moral rules. Whereas moral principles apply in any and all circumstances, moral rules apply only to occurring specific situations. A moral principle like "Always act in such a way as to promote the group's long-term advantage" could easily generate different moral rules. For example, rules permitting infanticide may be moral in societies where goods and re-sources are scarce, but not in societies where they are abundant.

In addition to being universally applicable, moral principles may override other types of principles. They take precedence over corrupt laws and social institutions, for example. Before the passage of the Civil Rights Act, it was legally permitted, though certainly not morally justified, to keep African-Americans out of for-whites-only restaurants. Similarly, at a state-supported all-male military academy, it is legally permitted but not morally justified to exclude female candidates as cadets, even if the presence of women would destroy what the male cadets regard as the "special" (i.e., chauvinistic) atmosphere of their men-only club. Morality is stronger than opinions, beliefs, and laws.

Of course, if moral principles are to serve as both guides for and standards of our actions, they must be made public. Morality is not a secret to be kept hidden for the chosen few. If women have rights, for example, women cannot sit in their armchairs silently thinking about pursuing life, liberty, and happiness. On the contrary, women must

Traditional Types of Ethical Theories: General Definitions

There are about as many definitions of ethics as there are ethicists. Nevertheless, the definitions tend to share certain features. In *Discovering Right and Wrong*, philosopher Louis P. Pojman provides a definition of ethics that merits our close attention:

"Ethics" (or "moral philosophy," as it is sometimes called) will be used to designate the systematic endeavor to understand moral concepts and justify moral principles and theories. It undertakes to analyze such concepts as "right," "wrong," "permissible," "ought," "good," and "evil" in their moral contexts. Ethics seeks to establish principles of right behavior that may serve as action guides for individuals and groups. It investigates which values and virtues are paramount to the worthwhile life of the society. It builds and scrutinizes arguments in ethical theories, and it seeks to discover valid principles (for example, "Never kill innocent human beings") and the relationship between those principles (for example, does saving a life in some situations constitute a valid reason for breaking a promise?)."

Exponents of traditional ethics approve of Pojman's definition. They also praise him for claiming, as he later does, that moral principles play the role that legal statutes, rules of etiquette, and religious commandments play in their respective domains and that to count as a moral principle, a principle must be (1) prescriptive, (2) universalizable, (3) overriding, (4) public, and (5) practicable.

A prescription is a formula or recipe that a person needs to follow if certain ends are to be obtained. For example, I take my antibiotics prescription to the pharmacist. If she manages to decipher my physician's

is to help us secure what Pojman identifies as the four interrelated purposes of morality:

1. to keep society from falling apart
2. to ameliorate human suffering
3. to promote human flourishing
4. to resolve conflicts of interest in just ways²

Because we need to know what morality demands of us before we can do it, traditional ethicists have carefully examined (1) the nature of actions (are they required, forbidden, or merely permitted?); (2) the con-sequences of actions (are they good, bad, or merely indifferent?); and (3) the motives behind action (are they self-directed, other-directed, or both?). Because traditional ethicists have come to very different conclusions about the nature, consequences, and motives of moral actions, they have divided themselves into several schools of ethical thought, two of the major ones being utilitarianism and deontology.

UTILITARIANISM: THE ETHICS OF THE GROUP'S GOOD

Utilitarianism is based on the principle of utility. An act is morally right if and only if there is no other act the agent could perform instead that would produce more good. Utilitarians consider both the utility-producing (good) and disutility-producing (bad) features of a set of possible actions, determining to perform the action most likely to produce the most good. For example, given a choice between aborting or not aborting her fetus, a woman must decide whether she will
