Middle English Literature Christopher Cannon, 2013-04-18 This book provides a boldly original account of Middle English literature from the Norman Conquest to the beginning of the sixteenth century It argues that these centuries are in fundamental ways the momentous period in our literary history for they are the long moment in which the category of literature itself emerged as English writing began to insist for the first time that it floated free of any social reality or function This book also charts the complex mechanisms by which English writing acquired this power in a series of linked close readings of both canonical and more obscure texts It encloses those readings in five compelling accounts of much broader cultural areas describing in particular the productive relationship of

Middle English writing to medieval technology insurgency statecraft and cultural place concluding with an in depth account of the particular arguments emphases and techniques English writers used to claim a wholly new jurisdiction for their work Both this history and its readings are everywhere informed by the most exciting developments in recent Middle English scholarship as well as literary and cultural theory It serves as an introduction to all these areas as well as a contribution in its own right to each of them
