appreciate Perl s text manipulation features and its CGI pm module which gives a well integrated object oriented interface to practically all CGI related tasks While other languages might be more elegant or more efficient Perl is still considered the primary language for CGI CGI Programming with Perl Second Edition offers a comprehensive explanation of using CGI to serve dynamic web content Based on the best selling CGI Programming on the World Wide Web this edition has been completely rewritten to demonstrate current techniques available with the CGI pm module and the latest versions of Perl The book starts at the beginning by explaining how CGI works and then moves swiftly into the subtle details of developing CGI programs Topics include Incorporating JavaScript for form validation Controlling browser caching Making CGI scripts secure in Perl Working with databases Creating simple search engines Maintaining state between multiple sessions Generating graphics dynamically Improving performance of your CGI scripts **Webpage Construction Kit Internet Design Shop** ,2002 **Python Scripting for Computational Science** Hans Petter Langtangen,2013-03-14 The primary purpose of this book is to help scientists and engineers work ing intensively with computers to become more productive have more fun and increase the reliability of their investigations Scripting in the Python programming language can be a key tool for reaching these goals 27 29 The term scripting means different things to different people By scripting I mean developing programs of an administering nature mostly to organize your work using languages where the abstraction level is higher and program ming is more convenient than in Fortran C C or Java Perl Python Ruby Scheme and Tel are examples of languages supporting such high level programming or scripting To some extent Matlab and similar scientific com puting environments also fall into this category but these environments are mainly used for computing and visualization with built in tools while script ing aims at gluing a range of different tools for computing visualization data analysis file directory management user interfaces and Internet communi cation So although Matlab is perhaps the scripting language of choiee in computational science today my use of the term scripting goes beyond typi cal Matlab scripts Python stands out as the language of choice for scripting in computational science because of its very elean syntax rieh modulariza tion features good support for numerical computing and rapidly growing popularity What Scripting is About **Learning Perl on Win32 Systems** Randal L.
