Advanced Reporting Beyond News Events:

Advanced Reporting Gerry Keir, Maxwell E. McCombs, Donald Lewis Shaw, 1991 **Advanced Reporting** Bruce Garrison, 1992 The companion book to Professional News Reporting this volume offers readers a look at advanced information gathering techniques Easy to read and well illustrated this text goes beyond a general introduction to news reporting by focusing on advanced and specialized reporting skills Filled with contemporary examples from award winning newspapers and television stations it is designed for students with a foundation in news writing To help them hone their skills it provides chapters which focus on a variety of specialized report types Mirroring numerous changes in the art and science of information gathering in the past decade this important volume provides useful strategy tips complete with recent illustrative examples The final chapter focuses on computer based reporting a must for any professional journalist and the appendix lists investigative reporting resources contributed by Orlando Sentinel reporter Jim Leusner

Computer-assisted Reporting Bruce Garrison, 2020-07-20 Reporters in the newsroom are becoming more involved in computer assisted reporting and online news research than ever before This edition introduces readers to computer assisted reporting and to describe how leading journalists are using personal computers for news gathering in modern print broadcast and online newsrooms It provides a thorough discussion of technology and its applications to news reporting Computer Assisted Reporting focuses on the computerization of newsgathering highlighting the fact that the computer assists journalists by making writing easier and also makes gathering and organizing information more efficient As it begins the book demonstrates methods for journalists to get more from their computers such as data retrieval data analysis information storage and dissemination of that information in both processed and unprocessed forms It concludes with a refined proposal originally proposed in the first edition for five stages for development of computer literacy in the newsroom

The Human Journalist Jim Willis, 2003-10-30 Willis examines the many orientations and perspectives of reporters that gather and present the news of the day Debunking the notion that there are limited perspectives journalists may use Willis examines up to 15 different orientations that reporters bring to their work These perspectives run the gamut from the traditional approach of distancing oneself completely from events and people involved to becoming part of the story's fabric to ascertain the story's true essence Willis also suggests that for many stories it is wholly appropriate for journalists to feel what a non professional would experience at such an event and to allow those emotions to fuel the reporting and writing of the story Several examples are discussed in detail including the coverage of the bombing of the Alfred P Murrah Federal Building in Oklahoma City on April 19 1995 and the terrorist attacks of September 11 2001 **Covering the Community** Leigh Stephens Aldrich, 1999-03-22 A guide to the fair reporting and portrayal of minority groups with the intent of supporting community harmony in the culturally diverse world in which we live Leigh Stephens Aldrich provides a how to manual for identifying and presenting diversity in the media **History of the Mass Media in the United States**

Margaret A. Blanchard, 2013-12-19 The influence of the mass media on American history has been overwhelming History of the Mass Media in the United States examines the ways in which the media both affects and is affected by U S society From 1690 when the first American newspaper was founded to 1995 this encyclopedia covers more than 300 years of mass media history History of Mass Media in the United States contains more than 475 alphabetically arranged entries covering subjects ranging from key areas of newspaper history to broader topics such as media coverage of wars major conflicts over press freedom court cases and legislation and the concerns and representation of ethnic and special interest groups The editor and the 200 scholarly contributors to this work have taken particular care to examine the technological legal legislative economic and political developments that have affected the American media

Bad Tidings Lynne Masel-Walters, Lee Wilkins, Tim Walters, 2018-12-07 First Published in 1993 In the 1970s a book collecting research about the mass media and their role in disasters would have been unimaginable This book then is an attempt to compile a somewhat eclectic view of research on mass communication and catastrophe The editors have attempted to provide a sampling of the most recent empirical work on the mass media and disasters including everything from content analysis of media reports to studies of audience response to those events
