study initiated by Harvard University World Bank and I World Health Organization it was concluded that road injuries will be
ranked from number 9 today to number 3 within the next two to three decades if authorities all over the world do not pay
more attention to this significant problem Injuries in traffic do not only concern the patient himself but also the relatives from
an emotional point of view and the society from a socio economic point Both emerging markets and industrial countries have
significant experience of the events following a traffic accident Much effort has been directed towards transportation of the
victim from the scene of the accident to intensive care unit in the hospital Simultaneously the awareness of our knowledge
about how these injuries should be prevented is striking The focus of this second book of transportation traffic safety and

which they also support sustainable development *Sustainable Development OECD Policy Approaches for the 21st Century*
