Advances in Intelligent Data Analysis VI A. Fazel Famili,Joost N. Kok,José M. Pena,Arno Siebes,Ad Feelders,2005-08-30 One of the superb characteristics of Intelligent Data Analysis IDA is that it is an interdisciplinary eld in which researchers and practitioners from a number of areas are involved in a typical project This also creates a challenge in which the success of a team depends on the participation of users and domain experts who need to interact with researchers and developers of

any IDA system All this is usually reflected in successful projects and of course on the papers that were evaluated by this year's program committee from which the national program has been developed In our call for papers we solicited papers on i applications and tools ii theory and general principles and iii algorithms and techniques We received a total of 184 papers reviewing these was a major challenge Each paper was assigned to three reviewers In the end 46 papers were accepted which are all included in the proceedings and presented at the conference This year's papers reflect the results of applied and theoretical research from a number of disciplines all of which are related to the field of Intelligent Data Analysis To have the best combination of theoretical and applied research and also provide the best focus we have divided this year's IDA program into tutorials invited talks panel discussions and technical sessions Advances in Intelligent Data Analysis XVIII Michael Berthold, Feelders, Kreml, 2020-10-09 This open access book constitutes the proceedings of the 18th International Conference on Intelligent Data Analysis IDA 2020 held in Konstanz Germany in April 2020 The 45 full papers presented in this volume were carefully reviewed and selected from 114 submissions Advancing Intelligent Data Analysis requires novel potentially game changing ideas IDA's mission is to promote ideas over performance a solid motivation can be as convincing as exhaustive empirical evaluation This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use All rights not granted by the work's license are retained by the author or authors

Berthold, Hans-Joachim Lenz, Elizabeth Bradley, Rudolf Kruse, Christian Borgelt, 2011-03-16 We are glad to present the proceedings of the 5th biennial conference in the Intelligent Data Analysis series The conference took place in Berlin Germany August 28-30 2003 IDA has by now clearly grown up Started as a small symposium of a larger conference in 1995 in Baden Baden Germany it quickly attracted more interest both submission and attendance wise and moved from London 1997 to Amsterdam 1999 and two years ago to Lisbon Submission rates along with the ever improving quality of papers have enabled the organizers to assemble increasingly consistent and high quality programs This year we were again overwhelmed by yet another record breaking submission rate of 180 papers At the Program Chairs meeting we were based on roughly 500 reviews in the lucky position of carefully selecting 17 papers for oral and 42 for poster presentation Poster presenters were given the opportunity to summarize their papers in 3 minute spotlight presentations The oral spotlight and poster presentations were then scheduled in a single track 2.5 day conference program summarized in this book In accordance with the goal of IDA to bring together researchers from diverse disciplines we

achieved a nice balance of presentations from the more theoretical side both statistics and computer science as well as more application oriented areas that illustrate how these techniques can be used in practice Work presented in these proceedings ranges from theoretical contributions dealing for example with data cleaning and compression all the way to papers addressing practical problems in the areas of text classification and sales rate predictions A considerable number of papers also center around the currently so popular applications in bioinformatics
