Niazi,2016-01-05 What s the Deal with Biosimilars Biosimilars are gaining momentum as new protein therapeutic candidates that can help fill a vital need in the healthcare industry The biological drugs are produced by recombinant DNA technology that allows for large scale production and an overall reduction time in costs and development Part of a two volume set th

**Bioprocessing** Owen P. Ward,2012-12-06 Methods for processing of biological materials into useful products represent essential core manufacturing activities of the food chemical and pharmaceutical industries On the one hand the techniques involved include well established process engineering methodologies such as mixing heat transfer size modification and a variety of separation and fermentation procedures In addition new bioprocessing practices arising from the exciting recent advances in biotechnology including innovative fermentation cell culture and enzyme based operations are rapidly extending the frontiers of bioprocessing These developments are resulting in the introduction to the market place of an awesome range of novel biological products having unique applications Indeed the United States Office of Technology Assessment has concluded that competitive advantage in areas related to biotechnology may depend as much on developments in bioprocess engineering as on innovations in genetics immunology and other areas of basic science Advances in analytical instrumentation computerization and process automation are playing an important role in process control and optimization and in the maintenance of product quality and consistency characteristics Bioprocessing represents the industrial practice of biotechnology and is multidisciplinary in nature integrating the biological chemical and engineering sciences This book discusses the individual unit operations involved and describes a wide variety of important industrial bioprocesses I am very grateful to Sanjay Thakur who assisted me in the collection of material for this book

**Bioreactor System Design** Juan A. Asenjo,1994-11-17 Describes the state of the art techniques and methods involved in the design operation preparation and containment of bioreactor systems taking into account the interrelated effects of variables associated with both upstream and downstream stages of the design process The importance of the initial steps in the development of a bioprocess such

**High Value Fermentation Products, Volume 1** Saurabh Saran,Vikash Babu,Asha Chaubey,2019-03-12 Green technologies are no longer the future of science but the present With more and more mature industries such as the process industries making large strides seemingly every single day and more consumers demanding products created from green technologies it is essential for any business in any industry to be familiar with the latest processes and technologies It is all part of a global effort to go greener and this is nowhere more apparent than in fermentation technology This book describes relevant aspects of industrial scale fermentation an expanding area of activity which already generates commercial values of over one third of a trillion US dollars annually and which will most likely radically change the way we produce chemicals in the long term future From biofuels and bulk amino acids to monoclonal

antibodies and stem cells they all rely on mass suspension cultivation of cells in stirred bioreactors which is the most widely used and versatile way to produce Today a wide array of cells can be cultivated in this way and for most of them genetic engineering tools are also available Examples of products operating procedures engineering and design aspects economic drivers and cost and regulatory issues are addressed In addition there will be a discussion of how we got to where we are today and of the real world in industrial fermentation This chapter is exclusively dedicated to large scale production used in industrial settings
