Being Human:

Being Human Elton B. McNeil, 1973 *Being Human* Richard Gross, 2013-01-11 Richard Gross turns his expert eye to the psychology of human nature in a contemplative account encompassing cognition consciousness language time perception sense of mortality and human society This book will help you to consider the unique aspects of being human and to understand the biological underpinnings for the intriguing and distinct behaviours and experiences common to human beings The book is enhanced throughout by its logical arrangement of topics with key questions issues for additional focus and reflection points highlighted throughout useful chapter introductions and summaries to provide clarity and insight diagrams to help explain difficult concepts detailed selection of references and useful sources including works from the fields of psychology philosophy religion and literature This book is essential reading for students of psychology and related disciplines as well as general readers seeking insights into one of the most enduring questions to have faced humankind throughout history

Being Human Roger Smith, 2007-09-11 Challenging commonly held biological religious and ethical beliefs internationally well known historian of science Roger Smith boldly argues that human nature is not some thing awaiting discovery but is active in understanding itself According to Smith being human is a self creation made possible through a reflective circle of thought and action with a past and a future and studying this history from a range of perspectives is fundamental to human self understanding Smith s argument brings together historical and contemporary debates concerning materialism and human nature and the relations of the different fields of knowledge He draws on classic writings from across the human sciences touching on sociology anthropology brain sciences history philosophical hermeneutics and critical theory and demonstrates that there is no position outside history for an absolutely objective or eternally valid view of human nature The question what is human does not have and could not possible have one answer Instead there exists a variety of answers for different purposes and there are good reasons for the many conceptions of what it is to be human Smith does not treat human nature as only biological economic or moral but as a multidimensional subject that should be considered in its proper historical context By understanding this context Smith believes we can come to a truer understanding of ourselves Persuasively and elegantly written *Being Human* takes an important new turn in the philosophical study of being human

An Introduction to African Legal Philosophy John Murungi, 2013-04-11 A book on legal philosophy necessarily focuses attention on law In addition to this focus *An Introduction to an African Legal Philosophy* focuses attention on philosophy The link between law and philosophy is brought into relief which is done through an African context An attempt is made to spell out what is African about legal philosophy without being cut off of African legal philosophy from non African legal philosophy The book draws attention to the view that a basic component of African legal philosophy consists of an investigation of what it is to be an African and because an African is a human being among other human beings the investigation is about what it is to be a human being Ubuntuism is an African derived word that captures this mode of being

human Moreover because human beings are cultural beings African cultural context guides the investigation Inescapably it is claimed that every legal philosophy is embedded in a culture African legal philosophy is not an exception It is deeply rooted in African culture a culture that is today shaped in part by a European colonialist culture One feature that will strike one as one reads the book is that the book approaches African legal philosophy as a means of decolonization of African culture African legal philosophy can accomplish this intelligently and effectively if it is itself decolonized In doing this it contrasts sharply with mainstream Western legal philosophy

Visions of Humanity Sönke Kunkel, Jessica C.E.

Gienow-Hecht, Sebastian Jobs, 2023-09-15 This book offers a critical reflection of the historical genesis transformation and problematic of humanity in the transatlantic world with a particular eye on cultural representations Humanity the essays show was consistently embedded in networks of actors and cultural practices and its meanings have evolved in step with historical processes such as globalization cultural imperialism the transnationalization of activism and the spread of racism and nationalism Visions of Humanity applies a historical lens on objects work and sounds to provide a more nuanced understanding of the historical tensions and struggles involved in constructing invoking and instrumentalizing the we of humanity

A Manual for Being Human Soph, 2021-07 A self help book for those suffering from anxiety stress low mood insecurity or those who simply wish to understand how our minds work and what we can do cope better with life's challenges

Race in the Vampire Narrative, 2015-01-01 Race in the Vampire Narrative unpacks the vampire through a collection of classroom ready original essays that explicitly connect this archetypal outsider to studies in race ethnicity and identity Through essays about the first recorded vampire craze television shows True Blood and Being Human movies like Blade Trinity and Underworld to the presentation of vampires of colour in romance novels graphic novels on stage and beyond this text will open doorways to discussions about Otherness in any setting serving as an alternative way to explore marginality through a framework that welcomes all students into the conversation Vampires began as terrors nightmares the most horrifying of creatures now they are sparkly antiheroes more likely to kill your dog than drink you to death commodified absorbed and defanged Race in the Vampire Narrative demonstrates that the vampire serves as a core metaphor for the constructions of race and the ways in which we identify manufacture and commodify marginalized groups By drawing together disparate discussions of non white vampires in popular culture the collection illustrates the ways in which vampires can be used to explicitly help students understand ethnicity in the modern world making this the perfect companion text to any course from First Year Studies Sociology History Cultural Studies Women's Studies Criminal Justice and so much more

Being Human Rowan Williams, 2018-03-15 What is consciousness Is the mind a machine What makes us persons How can we find the path to human maturity These are among the fundamental questions that Rowan Williams helps us to think about in this deeply engaging exploration of what it means to be human The book ends with a brief but profound meditation on the person of Christ inviting us to consider how through him our humanity in all its variety in all its vulnerability has been taken

into the heart of the divine life With discussion questions for personal or group use at the end of each chapter this is a book that readers of all religious persuasions will find both challenging and highly rewarding Contents 1 What is consciousness 2 What is a person 3 Bodies minds and thoughts 4 Faith and human flourishing 5 Silence and human maturity Epilogue Humanity transfigured *Priority in Aristotle's Metaphysics* Michail M. Peramatzis,2011-08-11 The idea that some parts of reality are fundamental and others derivative was an important one in Aristotle s philosophical system and is now again of great current interest in philosophy Michail Peramatzis presents a new account of priority relations in Aristotle s metaphysics and draws out their continuing philosophical significance Centering Humanism in STEM Education Bryan Dewsbury,Susannah McGowan,Sheila S. Jaswal ,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM **Confessions of a Heretic** Eric Leland Saak,2025-06-15 This book is the second of a planned three volume systematic theology under the title Confessions of a Heretic Volume One which has the subtitle Philosophical Considerations was published by Archway in 2024 The project now turns to Theological Considerations with the forthcoming Volume Three being Ecclesiological Consideration Organized into three Parts Volume Two focuses on the theological endeavor and the doctrines distinctive to Christianity namely the Trinity Jesus Christ sin and salvation Based on the foundational distinctions and definitions explicated in Volume One the current volume seeks to ask what the philosophical considerations imply for basic traditional understandings and terminology of Christian theology including that of Jesus of Nazareth his crucifixion and resurrection The project as a whole adopts a trinitarian structure with this second volume focused on God the Son or as here termed God the Perfector The argument is that Christian Theology needs to shift from an anthropocentric to a theocentric approach recognizing human beings simply as creatures and having the courage to face what that entails Yet doing so necessitates a radical reconceptualization of the very foundations of Christian Theology itself in the attempt to combat idolatry **On Being and Becoming Human** Willard Gaylin,1991 In an age of robotics artificial intelligence and renewed respect for animals are we still such extraordinary creatures In *On Being and Becoming Human* psychiatrist Willard Gaylin uses two of Western culture s most powerful legends Adam and Eve and

Pinocchio to define the fundamental nature of being human **On Being Human** Jerome Kagan,2016-01-01 Kagan ponders a series of important nodes of debate while challenging us to examine what we know and why we know it Most critically he presents an elegant argument for functions of mind that cannot be replaced with sentences about brains while acknowledging that mind emerges from brain activity He relies on the evidence to argue that thoughts and emotions are distinct from their biological and genetic bases In separate chapters he deals with the meaning of words kinds of knowing the powerful influence of social class the functions of education emotion morality and other issues And without fail he sheds light on these ideas while remaining honest to their complexity Publisher s description Being Human Collection Dr Carrie Hayward ,2023-10-31 Written by a specialist in Acceptance and Commitment Therapy the Being Human series features four narratives that delve into the complexities of our shared human experience As humans we are all prone to psychological struggle Life is full of challenges hardships and emotional pain The Being Human series seeks to equip readers with the psychological resilience and flexibility to live a meaningful life in spite of these difficulties The four books each focus on a different aspect of the human condition providing teachings and practical processes for readers to implement in their lives The Lost Sun focuses on the importance of values based living The Flower in the Pocket emphasizes transforming pain into growth The Unwanted Friend explores the realm of thoughts The Dragonfly in the Haze discusses our growing disconnect with the world and each other Together these books form the comprehensive Being Human Method fostering self awareness meaningful relationships and a purposeful existence Dive in and discover the tools to reconnect with others and yourself

Embracing the Song of Phrase: An Emotional Symphony within **Being Human**

In a world used by monitors and the ceaseless chatter of immediate communication, the melodic splendor and mental symphony developed by the prepared term frequently disappear into the background, eclipsed by the relentless noise and interruptions that permeate our lives. However, situated within the pages of **Being Human** a stunning literary prize brimming with raw thoughts, lies an immersive symphony waiting to be embraced. Constructed by an outstanding composer of language, this interesting masterpiece conducts viewers on a mental trip, well unraveling the hidden tunes and profound impact resonating within each cautiously constructed phrase. Within the depths of this touching evaluation, we can investigate the book is key harmonies, analyze their enthralling publishing fashion, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
