The Idea of the Sciences in the French Enlightenment G. Matthew Adkins, 2013-11-29 This book challenges common historical misperceptions of both the history of the sciences in early modern France and the history of the French Enlightenment By reexamining the moral political and social ideas of those who defended the ascendancy of the sciences this book demonstrates the evolution of political views

The Science and Art of Elocution, Or How to Read and Speak Frank H. Fenno, 1878

A People's History of Science Clifford D Conner, 2009-04-24 We all know the history of science that we learned from grade school textbooks How Galileo used his telescope to show that the earth was not the center of the universe how Newton divined gravity from the falling apple how Einstein unlocked the mysteries of time and space with a simple equation This history is made up of long periods of ignorance and confusion punctuated once an age by a brilliant thinker who puts it all together These few tower over the ordinary mass of people and in the traditional account it is to them that we owe science in its entirety This belief is wrong A People's History of Science shows how ordinary people participate in creating science and have done so throughout history It documents how the development of science has affected ordinary people and how ordinary people perceived that development It would be wrong to claim that the formulation of quantum theory or the structure of DNA can be credited directly to artisans or peasants but if modern science is likened to a skyscraper then those twentieth century triumphs are the sophisticated filigrees at its pinnacle that are supported by the massive foundation created by the rest of us
