Knowledge Based Systems Paul H. Duffin, 1988 Knowledge Based Systems Methods Christopher Harris-Jones, 1995
The primary audience for this text is that large group of individuals in IT departments now contemplating the prospect of developing KBS within their own organisations The aim of the book is to provide a framework for understanding how KBS technology can be used to increase the range of Information Systems currently being developed and to describe a set of the main KBS methods currently available in sufficient detail for readers to understand the essentials of these methods This is done by providing a conceptual framework to show how the various elements of KBS fit into the development of conventional software systems The relationship between conventional and knowledge based systems and the need to integrate the two permeates the whole book Practical advice is also given on how methods integration can be achieved This book describes the most important methods used commercially to build knowledge based systems and readers will be able to start building KBS in a structured way in a commercial environment It takes the highest profile in academic methods and describes them in a way acceptable to commercial systems developers and takes a unified view of conventional IT and KBS through the presentation of an academically sound model The Benefit/Risk Ratio Hans C. Korting, M. Schafer-Korting, 1998-07-24 The use of drugs as remedies for various types of diseases has a long tradition however it has only been recently recognized that the value of any given compound must be evaluated in light of its benefit to risk ratio When prescribing drugs physicians must look at the big picture of the drug s benefits in relation to its side effects and possib

BOOK JACKET Knowledge-based Systems for Financial Executives Carl Fink,1991 Critical Issues in Information Processing Management and Technology ,1989 **Maintenance of Knowledge-based Systems** Frans Coenen,Trevor J. M. Bench-Capon,1993 The practical take up of Knowledge Based Systems KBSs is usually described as disappointing One explanation of the reluctance of organisations to make a real commitment to these systems stems from the lack of well defined techniques to engineer them in an acceptable manner Without the assurance of quality that can be given by the use of a proven methodology the risk of investing substantially in these systems will remain a risk too great to be taken One of the chief manifestations of the lack of these techniques is that it is impossible to say with any assurance that it will be possible to maintain the systems so that their useful life can be extended This book is concerned with the maintenance of KBSs providing a balance between the academic and the practical and containing analysis of tools developed in a research project The intention of the book is to move from very general concerns available to all systems through to specific techniques and tools designed to address particular problems in particular representations before concluding with some more general remarks This book is essential reading for anyone whether in a commercial or academic environment who wishes to build a serious Knowledge Based System that will continue to be used over a period of time

SPECIAL FEATURES Building a Knowledge Based System is not the end of the story the system must be used and during its period of use the knowledge on which it relies will change and develop A Knowledge Based System that is not to become rapidly obsolete must change and develop with it This book addresses this neglected area of maintenance emphasising the specific maintenance tasks required by a Knowledge Based System The book provides a balance between the academic and the practical and containing analysis of tools developed in a research project Scientific and Technical Aerospace Reports ,1988

Human Factors in Hazardous Situations Royal Society (Great Britain). Discussion Meeting,1990 **Management** ,1989 Computer Education ,1990 Management: A Bibliography for NASA Managers ,1989 **New Scientist** ,1990-02 **Knowledge-Based Systems and Legal Applications** T.J.M. Bench-Capon,1991-01-28 Describes the largest knowledge based system KBS and law project and outlines several prototype systems Providing an authoritative survey of approaches to legal knowledge representation this book discusses the integration of KBS and law issues with HCI and the social implications The 1995 Goddard Conference on Space Applications of Artificial Intelligence and Emerging Information Technologies Carl F. Hostetter,1995 **Safe and Sound** John Fox,Subrata Kumar Das,2000 Fox and Das insist that the same intelligence artificial and human must be applied to guaranteeing safety as to assuring acceptable task performance Medicine is an excellent field for application of this approach but it also serves as an example for the entire field
