

Clinical Skills Assessment (CSA)

The CSA is a clinical skills examination required for graduation from the School of Medicine. The CSA uses standardized patient (SP) encounters to assess student performance in:

- Data gathering technique (history and physical examination)
- Interpersonal communication
- Clinical management (diagnostic strategy and treatment plan)
- Professional documentation (post encounter note or PEN)

CSA is a formal examination of the School of Medicine covered by the University Honor System. Students must not discuss case content outside of approved sessions.

Scheduling

The CSA is provided on both the Kansas City and Wichita campuses on specified dates between May and July each year. Students should schedule CSA early to secure the most suitable date and location. Scheduling is arranged through

Wichita students – Karen Drake, Office Academic Student Affairs 3-2603

Kansas City students – Julie Mack, Neis Clinical Skills lab 8-2259

Rescheduling can only be arranged in an emergency and only a limited number of emergency slots are available.

Format

Each student completes 12 clinical encounters. In each encounter, the SP portrays a common clinical outpatient presentation. The specific location of the encounter (e.g. ambulatory clinic, emergency room) and other essential background information are provided for each case. The instructions for the case specify what is expected of students and the time allowed for the encounter. Typical instructions prior to a session are:

Mary Brown has come to the ambulatory clinic today because of shoulder pain. You have 15 minutes to take an appropriate history, perform a focused physical examination, communicate your assessment to the patient, and discuss an appropriate diagnostic and management plan with the patient.

The instructions for the case also include vital signs and any essential information such as laboratory or imaging test results.

Students should conduct the case as if they were the physician responsible for the patient. They must gather data from history and physical examination, communicate conclusions to the patient, and negotiate a management plan. All necessary equipment is provided to assess the case. If a sensitive physical examination (e.g. cornea, breast, rectal, vaginal) is indicated as part of the logical data-gathering for the case, students should tell the patient
