Being And Event:

Badiou's 'Being and Event' Christopher Norris,2009-05-24 Alain Badiou's *Being and Event* is the most original and significant work of French philosophy to have appeared in recent decades. It is the magnum opus of a thinker who is widely considered to have reshaped the character and set new terms for the future development of philosophy in France and elsewhere. This book has been written very much with a view to clarifying Badiou's complex and demanding work for non-specialist readers. It offers guidance on philosophical and intellectual context, key themes, reading the text, reception and influence, and further reading.

Logics of Worlds Alain Badiou,2013-04-11 *Logics of Worlds* is the sequel to Alain Badiou's much heralded masterpiece *Being and Event*. Tackling the questions that had been left open by *Being and Event* and answering many of his critics in the process, Badiou supplements his pioneering treatment of multiple being with a daring and complex theory of the worlds in which truths and subjects make their mark, what he calls a materialist dialectic. The radical recasting of ontology in *Being and Event* is followed and complemented here by a thoroughgoing transformation in our very understanding of logic, conceived as a theory not of being but of appearing. Unafraid to resurrect and reinvent the classical themes of philosophy, Badiou gives new meaning to concepts such as object, body, and relation, mobilising them in arresting studies that range from the architectural planning of Brasilia to contemporary astronomy and confronting himself with towering philosophical counterparts: Leibniz, Kant, Hegel, Kierkegaard, Lacan, Deleuze. The book culminates in an impassioned call to live for an Idea Now. In paperback, the book is accessible to a wider audience.

[Badiou's Being and Event and the Mathematics of Set Theory](#) Burhanuddin Baki,2014-11-20 Alain Badiou's *Being and Event* continues to impact philosophical investigations into the question of Being. By exploring the central role set theory plays in this influential work, Burhanuddin Baki presents the first extended study of Badiou's use of mathematics in *Being and Event*. Adopting a clear, straightforward approach, Baki gathers together and explains the technical details of the relevant high-level mathematics in *Being and Event*. He examines Badiou's philosophical framework in close detail, showing exactly how it is conditioned by the technical mathematics. Clarifying the relevant details of Badiou's mathematics, Baki looks at the four core topics Badiou employs from set theory: the formal axiomatic system of ZFC, cardinal and ordinal numbers, Kurt Gödel's concept of constructibility, and Cohen's technique of forcing. Baki then rebuilds Badiou's philosophical meditations in relation to their conditioning by the mathematics, paying particular attention to Cohen's forcing, which informs Badiou's analysis of the event. Providing valuable insights into Badiou's philosophy of mathematics, *Badiou's Being and Event and the Mathematics of Set Theory* offers an excellent commentary and a new reading of Badiou's most complex and important work.

The Immanence of Truths Alain Badiou,2022-05-19 The *Being and Event* trilogy is the philosophical basis of Alain Badiou's entire oeuvre. It is formed of three major texts which constitute a kind of metaphysical saga: *Being and Event* (1988), *Logics of the Worlds* (2006), and finally *The Immanence of Truths*, which he has been working on for 15 years. The new volume reverses the perspective

adopted in Logics of Worlds Where in that book Badiou saw fit to analyze how truths qua events appear from the perspective of particular worlds that by definition exclude them in The Immanence of Truths Badiou asks instead how the irruption of truths transforms the worlds within which they by necessity must arise An emphasis on regularity and continuity has given way to an attempt one unquestionable in its philosophical power and implications to formalize rupture and reconfiguration The Being and Event trilogy is a unique and ambitious work that reveals how truths can be at once context specific and universal situational and eternal
