Being A Philosopher The History Of A Practice:

Being a Philosopher David W. Hamlyn, 2002-11 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **The Philosopher's Index**, 2008 Vols for 1969 include a section of abstracts *Nietzsche and the Philosophers* Mark T. Conard, 2016-12-08 Nietzsche is undoubtedly one of the most original and influential thinkers in the history of philosophy In his works he not only grapples with previous great philosophers and their ideas but he also calls into question and redefines what it means to do philosophy Nietzsche and the Philosophers for the first time sets out to examine explicitly Nietzsche's relationship to his most important predecessors This anthology includes essays that discuss Nietzsche's engagement with such figures as Aristotle Kant Socrates Hume Schopenhauer Emerson Rousseau and the Buddha Anyone interested in Nietzsche or the history of philosophy generally will find much of great interest in this volume [The Rhetoric of Plato's Republic](#) James L. Kastely, 2015-08-25 J Kastely makes the case for Plato's Republic as a self consciously rhetorical work exploring a fundamental problem for philosophy He argues that the Republic is a mimetic poem responding to a discursive crisis within democracy namely the absence of a genuinely persuasive defense of justice Understanding the Republic as a work that raises persuasion as a key problem for philosophy requires us to rethink Plato's understanding of the relationship between philosophy and rhetoric This is a major and provocative reconsideration of the relationship of philosophy and rhetoric and raises issues central to a wide range of scholarly fields from political theory to psychology to aesthetics **English Essays from Sir Philip Sidney to Macaulay** Charles William Eliot, 1910 **The Political Philosophy of Michael Oakeshott** Paul Franco, 1990-01-01 **Breaking the Disciplines** Martin L. Davies, Marsha Meskimmon, 2003-08-22 International scholars explore the ways in which knowledge actually operates showing the limitations of now outmoded disciplines Coming from fields as diverse as anthropology philosophy literature aesthetics and art practice together they break down the boundaries between entrenched domains of knowledge Studies of objects which confound traditional definitions including a mechanical cow invented by an Irish farmer and the curious case of a mechanical monk show how a close look at an individual object can paradoxically open up dynamic new reconceptions of traditional systems of knowledge With social uses of knowledge currently a matter of public debate this should be a timely text
