Crowd Vol :

Macrotask Crowdsourcing Vassillis-Javed Khan, Konstantinos Papangelis, Ioanna Lykourentzou, Panos Markopoulos, 2019-08-06 Crowdsourcing is an emerging paradigm that promises to transform several domains creative work business work cultural cooperation etc Crowdsourcing reflects the close knit interplay between the latest computer technologies the rapidly changing work model of the 21st century and the very nature of people The interplay makes for an exciting but at the same time challenging new field to investigate under the lens of a diverse set of disciplines ranging from the technical to the social and from the theoretical to the applied Early research has focused on an aspect of crowdsourcing known as micro tasking Micro tasks are simple tasks like image annotations that anyone could perform An emerging area is how to utilize crowdsourcing to solve problems that go beyond simple tasks towards more complex ones that require collaboration and creativity In juxtaposition to micro task crowdsourcing this book investigates macro task crowdsourcing and its potential
