Designs and Graphs C.J. Colbourn, D. Jungnickel, A. Rosa, 2016-06-06 In 1988 the news of Egmont K hler s untimely death at the age of 55 reached his friends and colleagues It was widely felt that a lasting memorial tribute should be organized The result is the present volume containing forty two articles mostly in combinatorial design theory and graph theory and all in memory of Egmont K hler Designs and graphs were his areas of particular interest he will long be remembered for his research on cyclic designs Skolem sequences t designs and the Oberwolfach problem Professors Lenz and Ringel give a detailed appreciation of K hler s research in the first article of this volume There is however one aspect of Egmont K hler s biography that merits special attention Before taking up the study of mathematics at the age of 31 he had completed training as a musician studying both composition and violoncello at the Musikhochschule in Berlin and worked as a cellist in a symphony orchestra for some years This accounts for his interest in the combinatorial aspects of music His work and lectures in this direction had begun to attract the interest of many musicians and he had commenced work on a book on mathematical aspects of musical theory It is tragic indeed that his early death prevented the completion of his work the surviving paper on the classification and complexity of chords indicates the loss that his death meant to the area as he was almost uniquely qualified to bring mathematics and music together being a professional in both fields
