Differential Geometry Lecture Notes In Mathematics Vol 1263:

Harmonic Morphisms Between Riemannian Manifolds Paul Baird, John C. Wood, 2003 This is an account in book form of the theory of harmonic morphisms between Riemannian manifolds *Einstein Constraints and Ricci Flow* Mauro Carfora, Annalisa Marzuoli, 2023-01-10 This book contains a self consistent treatment of a geometric averaging technique induced by the Ricci flow that allows comparing a given generalized Einstein initial data set with another distinct Einstein initial data set both supported on a given closed n dimensional manifold This is a case study where two vibrant areas of research in geometric analysis Ricci flow and Einstein constraints theory interact in a quite remarkable way The interaction is of great relevance for applications in relativistic cosmology allowing a mathematically rigorous approach to the initial data set averaging problem at least when data sets are given on a closed space like hypersurface The book does not assume an a priori knowledge of Ricci flow theory and considerable space is left for introducing the necessary techniques These introductory parts gently evolve to a detailed discussion of the more advanced results concerning a Fourier mode expansion and a sophisticated heat kernel representation of the Ricci flow both of which are of independent interest in Ricci flow theory This work is intended for advanced students in mathematical physics and researchers alike [Handbook of Geometric Topology](#) R.B. Sher, R.J. Daverman, 2001-12-20 Geometric Topology is a foundational component of modern mathematics involving the study of spacial properties and invariants of familiar objects such as manifolds and complexes This volume which is intended both as an introduction to the subject and as a wide ranging resource for those already grounded in it consists of 21 expository surveys written by leading experts and covering active areas of current research They provide the reader with an up to date overview of this flourishing branch of mathematics *Contemporary Computational Mathematics - A Celebration of the 80th Birthday of Ian Sloan* Josef Dick, Frances Y. Kuo, Henryk Woźniakowski, 2018-05-23 This book is a tribute to Professor Ian Hugh Sloan on the occasion of his 80th birthday It consists of nearly 60 articles written by international leaders in a diverse range of areas in contemporary computational mathematics These papers highlight the impact and many achievements of Professor Sloan in his distinguished academic career The book also presents state of the art knowledge in many computational fields such as quasi Monte Carlo and Monte Carlo methods for multivariate integration multi level methods finite element methods uncertainty quantification spherical designs and integration on the sphere approximation and interpolation of multivariate functions oscillatory integrals and in general in information based complexity and tractability as well as in a range of other topics The book also tells the life story of the renowned mathematician family man colleague and friend who has been an inspiration to many of us The reader may especially enjoy the story from the perspective of his family his wife his daughter and son as well as grandchildren who share their views of Ian The clear message of the book is that Ian H Sloan has been a role model in science and life **Publicationes mathematicae** Kossuth Lajos Tudományegyetem.  Petrus J.M. Bongaarts,R. Martini,1988-10-12 This volume deals with one of the most active fields of research in mathematical physics the use of geometric and topological methods in field theory The emphasis in these proceedings is on complex differential geometry in particular on Kähler manifolds supermanifolds and graded manifolds From the point of view of physics the main topics were field theory string theory and problems from elementary particle theory involving supersymmetry The lectures show a remarkable unity of approach and are considerably related to each other They should be of great value to researchers and graduate students Number-Theoretic Analysis Edmund Hlawka,Robert F. Stochastic Analysis and Related Topics II Hayri Korezlioglu,Ali S. Ustunel,2006-11-14 The Second Silivri Workshop functioned as a short summer school and a working conference producing lecture notes and research papers on recent developments of Stochastic Analysis on Wiener space The topics of the lectures concern short time asymptotic problems and anticipative stochastic differential equations Research papers are mostly extensions and applications of the techniques of anticipative stochastic calculus Estimation of Distance Functions and Geodesics and Its Use for Shape Comparison and Alignment Roberto Facundo Mémoli Techera,2005 JMSJ Nihon Sūgakkai,2005 *Trudy i materialy nauchnykh kongressov i soveshchaniĭ, opublikovannye za rubezhom v ... gg* ,1987 New Developments in Lie Theory and Their Applications Juan Tirao,Wallach,2012-12-06 Representation theory and more generally Lie theory has played a very important role in many of the recent developments of mathematics and in the interaction of mathematics with physics In August September 1989 a workshop Third Workshop on Representation Theory of Lie Groups and its Applications was held in the environs of Córdoba Argentina to present expositions of important recent developments in the field that would be accessible to graduate students and researchers in related fields This volume contains articles that are edited versions of the lectures and short courses given at the workshop Within representation theory one of the main open problems is to determine the unitary dual of a real reductive group Although this problem is as yet unsolved the recent work of Barbasch Vogan Arthur as well as others has shed new light on the structure of the problem The article of D Vogan presents an exposition of some aspects of this problem emphasizing an extension of the orbit method of Kostant Kirillov Several examples are given that explain why the orbit method should be extended and how this extension should be implemented
