Handbook** Anthony Terrence Easton, 1983 High Above Chris Forrester, 2011-08-27 Frequently it is suggested that the golden age of television was during the period 1950 1960 It is true that television almost ruined Hollywood s fortunes during this period But if this was the authentic golden age then it was an age of black and white somewhat limited creativity poor reception lack of competition except in the United States and by and large public service broadcasting However if we take 1950 as a generic starting point for modern television broadcasting then we talk about a kind of prehistoric stage of the medium in which it remained for the best part of three decades The younger days of broadcasting were the 1980s the time when commercial television started on a large scale and in this youth was getting younger in terms of programming Luxembourg based SES Astra appeared on the scene at exactly this time Astra was instrumental in the dramatic developments in television that we have witnessed since then This is the story we want to tell in this book Without satellite technology and the success of satellite reception without the resulting mass market penetration of television sets and general economic prosperity we would not have the necessary base ingredients to make the great leap forward into digital into HDTV 3D television and the prospects of Ultra High Definition now in sight *Encyclopedia of Television* Horace Newcomb, 2014-02-03 The Encyclopedia of Television second edition is the
