Key Words democratization, economic reforms, inequality, market-preserving federalism, political reforms

■ **Abstract** China's economic growth and transition pose fascinating questions for social scientists. In the economic realm, **proponents of the market-preserving federalism (MPF) model** appear to have gone too far. In reality, China's central leadership has retained the prerogative to appoint top provincial officials as well as the power to reconfigure central-provincial fiscal relations, thus defying predictions of the MPF model. In the social realm, rapid growth has propelled the expansion of the middle class, but the large increase in inequality has sharpened social cleavages and class conflicts. The uncertainties of market transition and rising social conflicts pose major challenges for the ruling elite and for China's political development.

INTRODUCTION

Since at least the breakup of the Soviet Union, democratization has been the major theme of comparative politics research in political science. The People's Republic of China, however, has been conspicuously absent from the growing list of new democracies. Not surprisingly, the political science scholarship on China, with the exception of studies on the politics of Taiwan, has contributed relatively little to the burgeoning literature on democratization. Along the rich vein of democratization, social scientists working on China have been digging far afield, devoting much insightful attention to the introduction and popularization of elections in villages, **which are not part of the formal state apparatus.** For the Chinese leadership, having recently left behind the ravages of Mao's charisma and evil genius and survived the traumatic state-society confrontation
