The Regulation of Dietary Supplements Stephen J. Pintauro, 2018-12-07. This book documents the long, still ongoing battle between the US Food and Drug Administration and the dietary supplement industry. It presents the complex, often subtle and sometimes overlooked series of events that had a major impact on how dietary supplements are manufactured, marketed, sold, and used today. While the first few chapters focus on some background topics, the remaining chapters walk the reader through a timeline of events, legislative actions, FDA proposals and final rules, and judicial decisions that led to our current dietary supplement regulatory framework. Interwoven in narrative are examples of the roles of science, social and public policy, politics, and popular media. *Pharmaceutical Marketing* Ross Mullner, 2005. The purpose of this title is to address some of the complex and controversial issues posed by pharmaceutical marketing. Specifically, articles in this work will address the impact of direct-to-consumer advertising of drugs, the marketing of drugs over the Internet, pharmaceutical companies' marketing policies, and the marketing of herbal products which are not regulated by the United States Food and Drug Administration (FDA). Hopefully, it will provide many new insights into the benefits and pitfalls of pharmaceutical marketing. Originally published as *Journal of Consumer Marketing* 2005, Vol 22, No 7.
