Addressing the question of what kind of theoretical foundations are required if we wish to have a constructive attitude towards different religions this book scrutinizes aspects of the human condition personhood and notions of exclusive truth and tolerance In the book Wolterstorff suggests that persons have hermeneutic and related competences that account for their special dignity and that this dignity implies the right to practice religion freely Margolis emphasizes the contingent

character of all religious pursuits being products of a unique form of evolution humans need to create convincing purposes in an otherwise purposeless world Respondents criticize both views with an eye on the question of whether those views promote religious tolerance Grube criticizes the tendency for interreligious dialogue to be pursued under the parameters of an exclusive bivalent notion of truth according to which something is necessarily false if it is not true Under those parameters religions that differ from the one true religion must be false This explains why religious pluralists attempt to minimize the differences between religions at all costs and why others suggest implausibly strong concepts of tolerance As an alternative Grube proposes to drop exclusive concepts of truth and to conduct interreligious dialogue under the parameters of the concept of justification which allows for pluralisation The following discussion takes up this criticism of bivalence and its consequences for dealing with religious otherness This book was originally published as a special issue of the International Journal of Philosophy and Theology

Religions, Reasons and Gods John Clayton,2006-11-25 Traditional theistic proofs are often understood as evidence intended to compel belief in a divinity John Clayton explores the surprisingly varied applications of such proofs in the work of philosophers and theologians from several periods and traditions thinkers as varied as Ramanuja al Ghazali Anselm and Jefferson He shows how the gradual disembedding of theistic proofs from their diverse and local religious contexts is concurrent with the development of natural theologies and atheism as social and intellectual options in early modern Europe and America Clayton offers a fresh reading of the early modern history of philosophy and theology arguing that awareness of such history and the local uses of theistic argument offer important ways of managing religious and cultural difference in the public sphere He argues for the importance of historically grounded philosophy of religion to the field of religious studies and public debate on religious pluralism and cultural diversity
