Differences In Earnings And Ability:

Differences in Earnings and Ability Roger Hall Gordon, 1984 Tax Policy for Aging Societies A. Okamoto, 2012-12-06

The Japanese population is aging faster than any other in the world The per centage of Japan s population aged 65 and above was only 7 1% in 1970 but just 30 years later in 2000 it reached 17 2% A declining birth rate and a rising average life expectancy will continue to push this trend further This situation is causing serious problems for Japanese society Structural reforms especially tax and social security reforms to accommodate this drastic demographic change have become an urgent policy issue The purpose of this book is to establish guidelines for tax and social security reforms in Japan in terms that are both efficient and equitable In this study an extended life cycle general equilibrium model is employed to rigorously take account of the rapidly aging Japanese population The simulation approach adopted in our analysis permits us to calculate the effects of alternative policy packages on capital accumulation and economic welfare This enables us to make proposals for concrete economic policies

Social Stratification David B. Grusky, 2018-05-04 The book covers the research on economic inequality including the social construction of racial categories the uneven and stalled gender revolution and the role of new educational forms and institutions in generating both equality and inequality
