Different Drum Community Making And Peace:

The Different Drum Morgan Scott Peck,1988 Looks at the importance of community in contemporary society examining such topics as individualism group dynamics and nationalism

The Different Drum M. Scott Peck,2010-05-11 The overall purpose of human communication is or should be reconciliation It should ultimately serve to lower or remove the walls of misunderstanding which unduly separate us human beings one from another Although we have developed the technology to make communication more efficient and to bring people closer together we have failed to use it to build a true global community Dr M Scott Peck believes that if we are to prevent civilization destroying itself we must urgently rebuild on all levels local national and international and that is the first step to spiritual survival In this radical and challenging book he describes how the communities work how group action can be developed on the principles of tolerance and love and how we can start to transform world society into a true community

Culture of Peace Alan Kreider,2005-11-01 Why is peace such a divisive issue even among Christians Why is it so hard to practice right here right now Why is peace often considered an extra rather than an essential to faithful Christian living The three authors decided to write this book when the Indonesian member of the team remarked to the other two If the Christian church is to make any impact on Indonesia it must address itself to the biggest peace issue reconciliation with Muslims But before the writers could honestly consider that explosive possibility they first had to ask why Christians find it so difficult to live peaceably with other Christians They've discovered that conflict is often a prerequisite of peace They grant that peace is a continuum easier to live in some areas of life than in others They've learned that peace has two parents hard work and grace Living in peace is muscular activity The authors suggest how to develop peacemaking reflexes how churches can learn to handle conflict well and how to cultivate vulnerability and humility two essential attitudes of peacemakers True stories from communities around the world support this hopeful but strenuous call to faithful living

analysis begins with a discussion of theoretical issues involved in democratic participatory alternative and community communications. In light of these concepts the authors explore various alternative developments in new communications and information technologies as well as various social movements in local national and international settings. The issue to critical communications researchers is not just technology and its ability to process information but who owns it who controls it and who has access to it. In short who presses the buttons. The struggle for alternative democratic solutions will continue and this book is an attempt to engage in such struggle.
