and consciousness the role of information and the problem of realism in the new digital world Finally a considerable part of the book addresses the role of internal and external representations in scientific reasoning and creative inferences as well as the place of manipulation of objects and artifacts in human cognition Taking these topics together this book describes an aspect of an emerging agenda which is likely to carry the interaction between philosophy cognition and computing forward into the twenty first century The volume is based on the papers that were presented at the International European Conference Computing and Philosophy E CAP2004 Italy held at the University of Paiva Paiv Italy in June 2004 chaired by Lorenzo Magnani **Inquiry**, 1998 Swedish journal of philosophy, 1999 A Swedish journal of philosophy
